4. OPERATING THE HYDRAULIC STORAGE SYSTEM

The bed features a hydraulic lift mechanism for easy access to under-bed storage. Always operate with care.

1. Remove any heavy items from the mattress surface.
2. Stand at the foot or side of the bed.

3. Firmly grasp the lifting handle or edge of the bed frame.
4. With a steady motion, lift the bed frame upwards. The hydraulic pistons will assist in raising and holding the frame in the open position.

Ample Under-Bed Storage

The innovative hydraulic lift system allows for easy access to generous under-bed storage, perfect for stowing away extra bedding, clothes, or seasonal items.

2. Grasp the lifting handle or edge of the bed frame.
3. Gently pull the frame downwards. You may need to apply some downward pressure to overcome the hydraulic resistance.
4. Lower the frame slowly and evenly until it rests securely on the bed base.

5. MAINTENANCE

Regular maintenance helps prolong the life of your bed.

5.1 Cleaning

- **Upholstery:** For general cleaning, vacuum the fabric regularly using an upholstery attachment. For spills, blot immediately with a clean, dry cloth. For stubborn stains, consult a professional upholstery cleaner or use a mild fabric cleaner suitable for linen, testing on an inconspicuous area first.
- **Frame:** Wipe the bed frame with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.

5.2 Hardware Check

- Periodically check all bolts and screws to ensure they remain tight. Retighten as necessary to maintain stability.

5.3 Hydraulic System

- Inspect the hydraulic pistons for any signs of leakage or damage. If any issues are observed, contact customer

support.

- Do not attempt to lubricate or disassemble the hydraulic pistons yourself.
