Aoxun 10' x 14' Wall Mounted Gazebo with LED Lights Instruction Manual

Model: G30030+SL401BK02-ZJ

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your Aoxun 10' x 14' Wall Mounted Gazebo. Please read all instructions carefully before beginning assembly and retain this manual for future reference. This gazebo is designed to provide a shaded outdoor space, featuring a durable carbon steel frame, a polycarbonate roof for UV protection, and integrated LED lighting.

Safety Information

Always follow the provided instructions for assembly, installation, and use. Ensure the gazebo is securely wall-mounted with expansion bolts to withstand various weather conditions. Do not use the gazebo in windy or stormy conditions. Keep the area around the gazebo clear of debris and obstructions. Always supervise children and pets when using the gazebo.

- Ensure all components are present and undamaged before assembly.
- Wear appropriate safety gear during assembly (gloves, eye protection).
- Do not attempt to assemble alone; a minimum of two to three people is recommended.
- Verify the structural integrity of the wall where the gazebo will be mounted.
- Regularly inspect the gazebo for loose connections or damage.

SETUP AND ASSEMBLY

The Aoxun Wall Mounted Gazebo requires assembly. It is recommended that two to three people work together to complete the assembly, which typically takes two to three hours. Detailed, step-by-step instructions are included in the packaging. Ensure you have all necessary tools before starting.

Key Structural Features for Assembly

The gazebo features a robust design for stability and durability. Pay close attention to these elements during assembly:

- **Triangular Structure:** The dual triangular structure enhances the stability and durability of the hardtop terrace.
- **Metal Leg Support:** Equipped with four pre-drilled holes for easy connection to any type of flooring and secure installation.
- **Multiple-column Support:** Multiple aluminum tubes provide robust support for the top panel.

- **Wall-mounted:** Four screws are used to connect the unit to the wall, enhancing stability and enabling resistance against harsh weather conditions.

LED Light Installation

The included LED outdoor waterproof hanging lights. Follow the separate instructions provided with the lights for proper installation and connection. Ensure all connections are secure and waterproof.

OPERATING INSTRUCTIONS

Once assembled and securely mounted, your Aoxun gazebo provides a functional outdoor space. The polycarbonate top reflects 99% of UV rays, offering significant UV protection. The sloped roof design and integrated drainage holes ensure efficient rainwater runoff, preventing accumulation.

Using the LED Lights

The included LED lights are designed for outdoor use and are waterproof. They are typically solar-powered or battery-operated, providing illumination for extended periods. Refer to the specific light instructions for details on charging, activation, and usage modes.

MAINTENANCE

Regular maintenance will extend the lifespan and ensure the continued safety of your gazebo.

- **Cleaning:** Clean the polycarbonate roof and carbon steel frame periodically with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the materials.
- **Inspection:** Annually, or after severe weather, inspect all bolts, screws, and connections to ensure they are tight and secure. Check for any signs of rust, wear, or damage to the frame or roof panels.
- **Drainage:** Ensure drainage holes are clear of debris to allow for proper water runoff.
- **Winter Care:** While the gazebo is designed to be rust-resistant and withstand snow, it is advisable to clear heavy snow accumulation from the roof to prevent excessive stress on the structure.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Difficulty during assembly	Instructions unclear, missing parts, or incorrect orientation of components.	Review the illustrated instructions carefully. Ensure all parts are correctly identified and oriented. If parts are missing or damaged, contact customer support.
Gazebo feels unstable after assembly	Loose connections, improper wall mounting, or insufficient anchoring.	Verify all bolts and screws are tightened. Ensure the gazebo is securely mounted to the wall using appropriate expansion bolts and that all leg supports are anchored to the ground.
Water accumulation on roof	Drainage holes blocked or roof panels not correctly aligned.	Clear any debris from the drainage holes. Check that roof panels are installed according to instructions to maintain the proper slope for runoff.
LED lights not working	Battery not charged, faulty connection, or damaged light unit.	Ensure lights have sufficient charge (if solar/battery). Check all electrical connections. If issues persist, refer to the LED light manual or contact support.

SPECIFICATIONS
