6. MAINTENANCE AND CARE

Proper maintenance will extend the life and appearance of your loft bed.

- **Cleaning:** Wipe metal surfaces with a soft, damp cloth. For wooden surfaces (desk, shelves), use a dry or slightly damp cloth. Avoid harsh chemicals or abrasive cleaners, as they may damage the finish.
- **Fastener Check:** Periodically (e.g., every 3-6 months) check all screws, bolts, and connections to ensure they remain tight. Retighten as necessary to maintain stability.
- **Weight Distribution:** Distribute weight evenly on the bed and shelves. Avoid concentrating heavy items in one spot.
- **LED Lights:** If LED lights dim or stop working, check the power connection and the power adapter. If issues persist, contact customer support.
- **Avoid Excessive Moisture:** Keep the bed in a dry environment to prevent rust or damage to wooden components.

7. TROUBLESHOOTING

If you encounter any issues with your loft bed, refer to the following common troubleshooting steps:

- **Bed feels wobbly:** Ensure all assembly screws and bolts are fully tightened. Check that the bed is placed on a level surface.
- **LED lights not working:** Verify that the power adapter is securely plugged into both the light strip and a working electrical outlet. Check for any visible damage to the wiring.
- **Parts do not align during assembly:** Double-check the assembly manual to ensure you are using the correct parts for each step and that they are oriented correctly. Sometimes, loosening previously tightened screws can help with alignment before re-tightening.
- **Missing parts:** If you find any parts missing from your packages, refer to the parts list in your assembly manual and contact customer support with the specific part numbers.
