5. Care and Maintenance

5.1 Cleaning the Upholstery

The headboard and frame are upholstered with soft linen fabric. To clean:

- Gently vacuum the fabric regularly to remove dust and debris.
- For spills, blot immediately with a clean, dry cloth. Do not rub.
- For stubborn stains, use a mild fabric cleaner following the product instructions, testing on an inconspicuous area first.
- Avoid using harsh chemicals or abrasive cleaners, as these can damage the fabric.

5.2 Frame Maintenance

To ensure the longevity and stability of your bed frame:

- Periodically check and tighten all bolts and screws.
- Avoid dragging the bed frame when moving it; lift it to prevent damage to the legs and frame structure.
- Ensure the bed frame is placed on a level surface.

6. Troubleshooting

6.1 Bed Frame is Squeaking or Noisy

- **Solution:** Check all bolts and connections to ensure they are tightened securely. Loose hardware is a common cause of noise. The bed frame is designed with EVA silent strips and anti-slip pads to minimize noise, but re-tightening may be necessary over time.

6.2 Bed Frame Feels Unstable

- **Solution:** Verify that all support legs, especially the center support legs, are firmly in contact with the floor. Ensure all frame components are correctly assembled and tightened according to the instructions.
