

## Generic Cubot GT1 SMART WATCH

# Vaxson Privacy Screen Protector

Compatible with Cubot GT1 SMART WATCH  
Model: Cubot GT1 SMART WATCH Screen Protector

## INTRODUCTION

---

Thank you for choosing the Vaxson Privacy Screen Protector for your Cubot GT1 SMART WATCH. This manual provides essential information for the proper installation, use, and maintenance of your new screen protector. Please read it carefully to ensure optimal performance and longevity of the product.

## PRODUCT OVERVIEW

---

The Vaxson Privacy Screen Protector is designed to safeguard your Cubot GT1 SMART WATCH screen while offering enhanced privacy. Made from flexible plastic, it features anti-spy technology, scratch resistance, and self-healing properties.

### Key Features:

- **Privacy Protection:** Screen content is visible only to persons directly in front of the screen, preventing side glances.
- **4H Hardness:** Provides protection against daily scratches, scrapes, and normal wear.
- **Self-Healing Technology:** Minor scratches on the film can recover within 48 hours.
- **High Sensitivity:** Maintains original touch responsiveness for smooth interaction.
- **Hydrophobic & Oleophobic Coating:** Resists sweat and oil residue from fingerprints.
- **Bubble-Free Installation:** Designed for easy, bubble-free application.

### WHAT'S IN THE BOX

---

Your package should contain the following items:

- Vaxson Privacy Screen Protector (quantity as per order)
- Dry Wipe
- Micro Fiber Cloth

## INSTALLATION GUIDE

---

Follow these steps carefully for a successful, bubble-free installation:

1. **Clean the Screen:** Use the provided dry wipe and micro fiber cloth to thoroughly clean your Cubot GT1 SMART WATCH screen. Ensure there is no dust, smudges, or fingerprints. A clean screen is crucial for a perfect application.
2. **Align the Protector:** Carefully peel off the protective film from the adhesive side of the screen protector. Align the screen protector with the edges of your smartwatch screen. Take your time to ensure precise alignment.
3. **Apply and Smooth:** Once aligned, gently lay the screen protector onto the watch screen. Use a credit card or similar flat object (not provided) wrapped in the micro fiber cloth to smooth out any air bubbles, pushing them towards the edges.
4. **Final Touches:** If any small bubbles remain, they should disappear within 24-48 hours due to the self-healing properties of the film. Wipe the screen with the micro fiber cloth to remove any residue.

## OPERATING AND USAGE

---

Once installed, the Vaxson Privacy Screen Protector operates seamlessly with your Cubot GT1 SMART WATCH. Here's how its key features enhance your experience:

### Privacy Functionality:

The anti-spy feature darkens the screen when viewed from an angle, making your information visible only to you. This is particularly useful in public settings to protect sensitive data.

Data is visible only to persons directly in front of the device, while prying eyes beside you see only NOTHING.

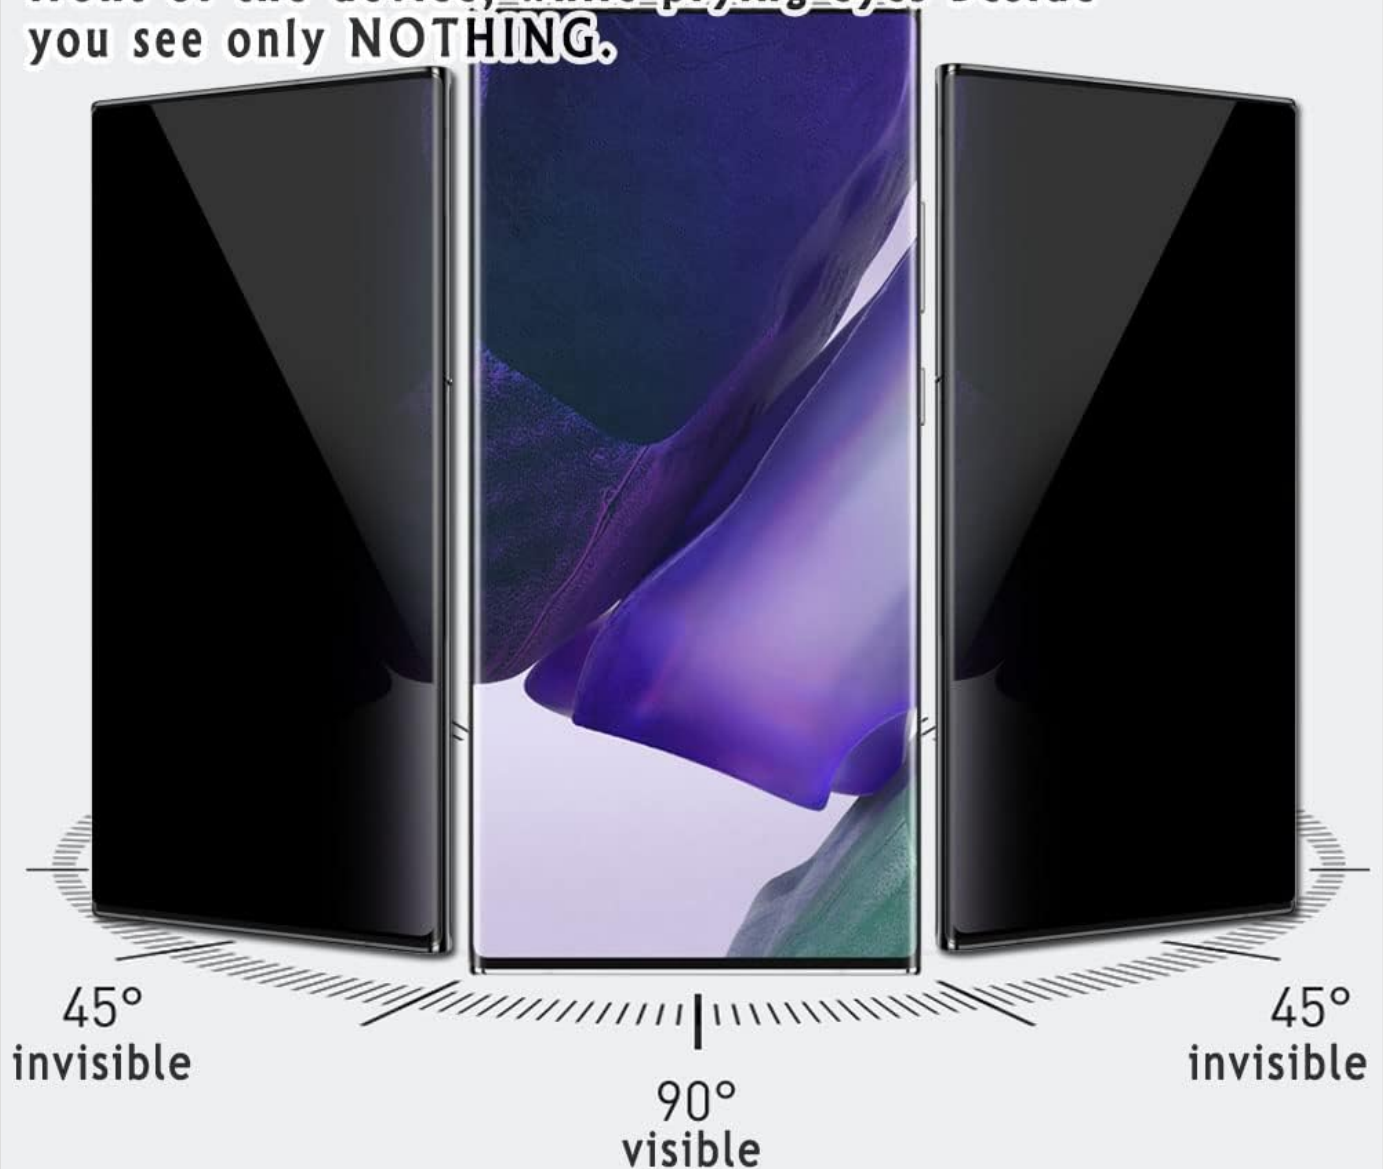

Image: Diagram illustrating the privacy feature, showing that data is visible only directly in front (90° visible) while becoming invisible from side angles (45° invisible).

**Note:** The privacy feature may slightly darken the screen. You might need to adjust your device's display brightness for optimal viewing.

#### **Touch Sensitivity:**

The ultra-thin material ensures that the screen remains fully responsive to every touch and tap, maintaining the original user experience of your smartwatch.

**Ultra-thin material keep the screen responsive to every touch and tap.**

## CARE AND MAINTENANCE

---

To ensure the longevity and effectiveness of your screen protector, follow these simple maintenance tips:

- **Cleaning:** Use the provided micro fiber cloth or a soft, lint-free cloth to gently wipe the screen protector. For stubborn smudges, slightly dampen the cloth with water or a screen cleaner designed for electronics. Avoid harsh chemicals or abrasive materials.
- **Protection:** While the protector offers 4H hardness, avoid direct contact with sharp objects like keys or knives to prevent deep scratches.

**4H: Resists scratches up to 4H,  
avoid sharp objects scratching or abrasion**

Image: A screen protector resisting scratches from a utility knife, illustrating its 4H hardness rating.

## Hydrophobic and oleophobic screen coating protects against sweat and oil residue from fingerprints.

## TROUBLESHOOTING

---

If you encounter any issues with your screen protector, refer to the following common problems and solutions:

- **Bubbles After Installation:** Small bubbles are common immediately after installation. Most will disappear within 24-48 hours due to the self-healing properties. For larger bubbles, gently lift the nearest edge of the protector and re-apply, smoothing it down.
- **Dust Under the Protector:** If dust particles are trapped, carefully lift the nearest edge of the protector and use a dust-absorber sticker (not provided) or a piece of tape to remove the dust from both the screen and the protector's adhesive side. Re-apply carefully.
- **Reduced Touch Sensitivity:** Ensure the screen protector is properly adhered without any gaps or air pockets. If the issue persists, ensure your device's touch settings are optimized.
- **Privacy Effect Too Strong/Screen Too Dark:** The privacy feature inherently darkens the screen. Increase your smartwatch's display brightness setting to compensate.

## SPECIFICATIONS

Brand	Generic
Compatible Devices	Cubot GT1 SMARTWATCH SMART WATCH
Material	Thermoplastic Polyurethane (Flexible Plastic)
Item Hardness	4H
Special Features	Privacy, Scratch Resistant, Bubble Proof, Matte Finish, Anti-Fingerprint, Anti-Shatter, Touch Sensitive
