Key Features

- **Powerful BLDC Motor:** Ultra-fast drying with a BLDC motor reaching up to 110,000 RPM.
- **High Power Output:** 1600-1900W for quick and efficient drying and styling performance.
- **Multiple Speed & Heat Settings:** 3-speed and 4-heat settings to cater to all hair types.
- **Magnetic Attachments:** Includes a styling concentrator, smoothing nozzle, and diffuser for versatile styling.
- **Cool Shot Function:** Independent cool shot to lock in your style and reduce frizz.
- **Overheating Protection:** Built-in overheating protection ensures safe and reliable use every time.
- **Easy to Clean:** Detachable rear cover allows easy access for cleaning the filter.
- **LED Indicator:** Clearly shows the current temperature and speed settings for ease of use.
- **Durable Construction:** Made with high-quality materials for long-lasting durability and performance.
- **Fast Drying & Styling:** High-speed airflow and adjustable settings for quick, professional results.

SAFETY INFORMATION

To avoid the risk of electric shock, never store or use the hair dryer near water, and always unplug it after use. Ensure the dryer is not damaged, and keep it away from children or individuals with disabilities unless supervised.

SETUP

1. Unpack the hair dryer and all accessories from the box.
2. Inspect the hair dryer and power cord for any signs of damage. Do not use if damaged.
3. Choose the desired magnetic attachment (concentrator, smoothing nozzle, or diffuser) and securely attach it to the front of the hair dryer.
4. Ensure your hands are dry before plugging the hair dryer into a suitable electrical outlet.

OPERATING INSTRUCTIONS

1. **Power On:** Plug in the hair dryer and press the power button to turn it on.
2. **Adjust Speed:** Use the speed control button to select one of the 3 available speed settings (low, medium, high). The LED indicator will show the current setting.
3. **Adjust Temperature:** Use the temperature control button to select one of the 4 available heat settings (cool, warm, hot, very hot). The LED indicator will display the selected temperature.
4. **Cool Shot Function:** For a burst of cool air to set your style, press and hold the cool shot button. Release the button to return to the previous heat setting.
5. **Styling:** Direct the airflow towards your hair, using the chosen attachment for desired styling results.
6. **Power Off:** After use, press the power button to turn off the hair dryer and unplug it from the electrical outlet.

MAINTENANCE

Cleaning the Filter

The VGR V-427 features a detachable rear cover for easy filter cleaning.

1. Ensure the hair dryer is unplugged and completely cool before cleaning.
2. Gently twist or pull the rear cover to detach it.
3. Use a soft brush or cloth to remove any dust or lint accumulated on the filter screen.
4. Reattach the rear cover securely.

General Care

- Do not wrap the power cord around the hair dryer, as this can damage the cord.
- Store the hair dryer in a dry place, away from direct sunlight and moisture.
- Clean the exterior of the hair dryer with a soft, damp cloth. Do not use abrasive cleaners.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Dryer does not turn on	Not plugged in; Power outlet issue; Internal fault	Ensure plug is fully inserted; Test outlet with another device; Contact customer support
Airflow is weak	Clogged air filter	Clean the rear air filter as described in the Maintenance section
Dryer overheats and shuts off	Overheating protection activated; Blocked air intake/outlet	Unplug and allow to cool for 10-15 minutes; Ensure air vents are clear; Clean filter
Attachments do not stay on	Not properly aligned; Damaged magnets	Realign and ensure a secure magnetic connection; Contact customer support if damaged
