### 5. MAINTENANCE AND CARE

---

Regular cleaning and maintenance will prolong the life of your hair dryer and ensure optimal performance.

- **Cleaning the Filter:** The V-401 features a detachable rear filter. Regularly remove and clean the filter to prevent dust and hair buildup, which can restrict airflow and cause overheating. Gently brush away debris or rinse under water if necessary, ensuring it is completely dry before reattaching.
- **General Cleaning:** Wipe the exterior of the hair dryer with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Storage:** Store the hair dryer in a cool, dry place. Do not wrap the power cord tightly around the appliance, as this can damage the cord.

### 6. TROUBLESHOOTING

---

If you encounter any issues with your VGR V-401 hair dryer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Hair dryer does not turn on.	No power supply; faulty outlet; damaged cord.	Check power connection. Try a different outlet. Inspect cord for damage; if damaged, do not use and contact support.
Low airflow or weak drying.	Blocked air inlet/outlet; dirty filter.	Ensure air vents are clear. Clean the detachable rear filter as per maintenance instructions.
Hair dryer overheats and shuts off.	Blocked airflow; prolonged use.	Unplug and allow to cool for at least 10-15 minutes. Clean the air filter. Ensure vents are not obstructed during use.
Attachments do not stay on.	Improper attachment; debris on magnetic surface.	Ensure attachments are correctly aligned and fully seated. Clean the magnetic surfaces on both the dryer and attachments.
