3. SETUP GUIDE

3.1 Connecting to a Display Device

The Arafuna Mini DVD Player offers two primary connection methods to your television, projector, or monitor:

HDMI Connection (Recommended for HD Displays)

Use the included HDMI cable to connect the HDMI OUT port on the DVD player to an HDMI IN port on your Smart TV, projector, or monitor. This connection provides the clearest video quality (up to 1080P HD).

AV Connection (For Standard Definition Displays)

For older televisions or displays without an HDMI port, use the included AV cable. Connect the colored plugs (Yellow for Video, White for Left Audio, Red for Right Audio) from the DVD player's AV OUT port to the corresponding AV IN ports on your TV.

5. MAINTENANCE

To ensure the longevity and optimal performance of your Arafuna Mini DVD Player, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the player. Do not use liquid cleaners or abrasive materials. For the disc tray, use a specialized disc cleaner if necessary.
- **Storage:** Store the player in a cool, dry place away from direct sunlight, extreme temperatures, and high humidity.
- **Handling Discs:** Always handle discs by their edges to avoid fingerprints and scratches. Store discs in their cases when not in use.

6. TROUBLESHOOTING

If you encounter any issues with your Arafuna Mini DVD Player, please refer to the following common solutions before contacting customer support:

Problem	Possible Cause	Solution
Player does not power on.	Power cable not connected properly; power outlet issue.	Ensure the power adapter is securely plugged into the player and a working electrical outlet. Try a different outlet.
No picture or sound on TV.	Incorrect input source selected on TV; loose HDMI/AV cables.	Select the correct input source (e.g., HDMI1, AV) on your TV. Check that all HDMI or AV cables are securely connected to both the player and the TV.
Disc does not play or skips.	Disc is dirty, scratched, or unsupported format/region.	Clean the disc with a soft cloth. Check if the disc is damaged. Verify that the disc format (e.g., Blu-ray) is supported. Although region-free, ensure the disc is not severely damaged.
USB/TF card not recognized.	Incorrect file system (not FAT32); unsupported file types; card size exceeds 32GB.	Ensure the USB drive or TF card is formatted to FAT32. Check that the files are in supported formats (AVI, MP3, JPG). Verify the storage size is 32GB or less.
