4.1 Converting Sofa to Bed (Express Mechanism)

The CALIFE sofa features an express convertible mechanism for quick and easy transformation:

1. **Remove Backrest Cushions:** Lift and remove the backrest cushions from the sofa.
2. **Pull Mechanism:** Locate the handle or strap behind the seat cushions. Pull it firmly upwards and outwards. The integrated bed frame and mattress will smoothly unfold.
3. **Extend Legs:** Ensure the support legs of the bed frame are fully extended and locked into place for stability.
4. **Pillow Storage:** Utilize the integrated pillow storage compartment located within the sofa frame to store your backrest cushions or pillows when the bed is in use.

4.2 Converting Bed to Sofa

To convert the bed back into a sofa:

1. **Fold Legs:** Retract and fold the support legs of the bed frame.

2. **Lift and Push:** Grasp the bed frame and lift it slightly, then push it inwards towards the sofa frame. The mechanism will fold back into the sofa.
3. **Replace Cushions:** Retrieve the backrest cushions from the storage compartment and place them back onto the sofa.

5. MAINTENANCE AND CARE

Proper care will extend the life and appearance of your CALIFE sofa:

- **Fabric Care:** The seat cushions are removable and feature a polyester fabric. For general cleaning, vacuum regularly to remove dust and debris. For spills, blot immediately with a clean, dry cloth. For deeper cleaning, follow the care instructions on the fabric label. It is generally recommended to use a mild fabric cleaner or have it professionally cleaned.
- **Cushion Care:** Periodically fluff and rotate cushions to maintain their shape and even out wear.
- **Mechanism Care:** The convertible mechanism is designed for durability. Avoid forcing the mechanism if it feels stiff. If needed, a small amount of silicone-based lubricant can be applied to moving parts, but consult a professional if issues persist.
- **Frame Care:** Wipe the visible parts of the frame with a soft, damp cloth. Avoid harsh chemicals.
- **Sunlight Exposure:** Avoid placing the sofa in direct sunlight for prolonged periods, as this can cause fabric fading.

6. TROUBLESHOOTING

Here are some common issues and their potential solutions:

Problem	Possible Cause	Solution
Sofa mechanism is stiff or difficult to operate.	Lack of lubrication; obstruction; misaligned parts.	Ensure no objects are obstructing the mechanism. Apply a small amount of silicone lubricant to moving joints. If misalignment is suspected, contact customer support.
Cushions appear flat or lumpy.	Normal wear and tear; uneven distribution of filling.	Fluff and rotate cushions regularly. For removable covers, gently redistribute the filling.
Squeaking noises during operation.	Loose fasteners; friction between metal parts.	Check and tighten any visible fasteners. Apply silicone lubricant to metal-on-metal contact points.
