## Gevi GIMN-1000C

# Gevi V2.0 Countertop Gemi Nugget Ice Maker

Model: GIMN-1000C

## 1. INTRODUCTION AND OVERVIEW

The Gevi V2.0 Countertop Gemi Nugget Ice Maker produces soft, chewable nugget ice, also known as pebble or Chewblet ice. This type of ice is ideal for cooling drinks while retaining their flavor. Designed for convenience, this machine offers quick ice production and user-friendly operation.

Figure 1.1: Gevi V2.0 Countertop Gemi Nugget Ice Maker

Key features include a viewing window, self-cleaning function, and two water refill options (manual pour or hose connection). It is built with stainless steel housing for durability and a sleek appearance.

## 2. SAFETY INFORMATION

Please read all instructions carefully before using the appliance. Keep this manual for future reference. Ensure the ice maker is placed on a stable, level surface. Do not block ventilation openings. Dispose of the appliance properly in accordance with federal and local regulations, as it contains flammable refrigerant (R600a).

Always unplug the ice maker before cleaning or performing any maintenance. Do not immerse the appliance, cord, or plug in water or other liquids. Keep out of reach of children.

### 3. PRODUCT COMPONENTS

The Gevi V2.0 Countertop Gemi Nugget Ice Maker comes with the following components:

- Ice Maker Unit
- Ice Scoop
- Removable Ice Basket
- 10ft 1/4" Hose (for auto water supply connection)
- User Manual

Figure 3.1: Ice Basket and Scoop

## 4. SETUP

Before first use, ensure the unit has been upright for at least 24 hours. Place the ice maker on a spacious, level countertop, ensuring adequate ventilation around the unit.

### 4.1 Water Refill Options

The Gevi ice maker supports two methods for water refilling:

1. **Manual Pour:** Open the lid and pour water directly into the reservoir. Ensure water level does not exceed the MAX fill line.

Figure 4.1: Manual Water Refill

2. **Auto Water Supply:** Connect the included 10ft 1/4" hose to a water supply line. This allows for continuous water refill without manual intervention.

Figure 4.2: Automatic Water Supply Connection

## 5. OPERATING INSTRUCTIONS

Once water is added and the unit is plugged in, press the 'On/Off' button on the control panel to begin ice production. The indicator light will illuminate to show the ice maker is active.

Figure 5.1: Control Panel

The ice maker can produce up to 38 pounds of ice in 24 hours. It features a 4.8-pound ice basket and a 2.8L (3 quarts) water reservoir. The unit is designed with extra thick insulation and double-layer space insulation to help retain ice longer.

## Excellent Performance

Figure 5.2: Ice Production and Capacity

The ice maker operates with low noise due to its high-performance compressor and muted exhaust fan. It includes safety features that automatically stop ice production if the water runs out or the ice basket is full.

## Keep Ice Longer

80% Ice Retention Rate at 80°F  
Ambient Temperature for 12h

1" Thick  
Material Insulation

Double Layer  
Space Insulation

Note: Ice basket does not have refrigeration system, transfer ice to freezer for long term storage.

## 6. MAINTENANCE

Regular cleaning and descaling are essential for optimal performance and longevity of your ice maker.

### 6.1 Self-Cleaning Function

The ice maker features an automatic self-cleaning cycle. To activate, ensure the water reservoir is filled, then press the 'Clean' button on the control panel. The unit will run a cleaning cycle to help prevent mineral buildup.

### 6.2 Descaling

If you live in an area with hard water, descaling should be performed more frequently. Refer to the provided map for recommended descaling frequency based on water hardness levels.

# Descale Your Adella Once A Month

More frequently if you live in an area with hard water.

Figure 6.1: Descaling Frequency Guide

## 6.3 Draining the Unit

To drain the unit for cleaning or storage, locate the drainage pipes at the back of the ice maker. Place the pipes over a sink or bucket to allow water to drain completely.

Figure 6.2: Drainage System

## 7. TROUBLESHOOTING

If the ice maker is not producing ice or is experiencing issues, check the following:

- **No Ice Production:** Ensure the unit is plugged in, the 'On/Off' button is pressed, and the water reservoir is filled. Check for any error indicator lights.
- **Ice Basket Full:** If the 'Ice Full' indicator light is on, empty the ice basket. The machine will resume production automatically.
- **Add Water:** If the 'Add Water' indicator light is on, refill the water reservoir. The machine will resume production automatically.
- **Unusual Noise:** The machine is designed for low noise operation. If unusual loud noises occur, ensure the unit is on a stable surface and contact customer support if the issue persists.
- **Ice Melting Quickly:** While the unit has thick insulation, it is not a freezer. For long-term storage, transfer ice to a freezer or insulated ice chest.

## 8. SPECIFICATIONS

| Feature                        | Specification             |
|--------------------------------|---------------------------|
| Brand                          | Gevi                      |
| Model Name                     | GIMN-1000C                |
| Product Dimensions (D x W x H) | 17.3" x 9.7" x 16.7"      |
| Ice Production Capacity        | Up to 38 lbs per 24 hours |
| Ice Basket Capacity            | 4.8 lbs                   |
| Water Reservoir Capacity       | 2.8 L (3 quarts)          |
| Wattage                        | 170 watts                 |
| Voltage                        | 120 Volts (AC)            |
| Refrigerant                    | R600a                     |
| Material                       | Stainless Steel           |
| Item Weight                    | 38 pounds                 |
| Installation Type              | Countertop                |
