VINGLI Above Ground Pool Safety Fence Instruction Manual

Model: above ground pool fence-8 Sections (Kit A-8 Sections)

1. INTRODUCTION

This instruction manual provides essential information for the safe and effective installation, operation, and maintenance of your VINGLI Above Ground Pool Safety Fence. This fence system is designed to enhance pool safety by creating a barrier around your above-ground pool, helping to prevent unauthorized access by children and pets. Please read this manual thoroughly before beginning installation or using the product.

2. IMPORTANT SAFETY INFORMATION

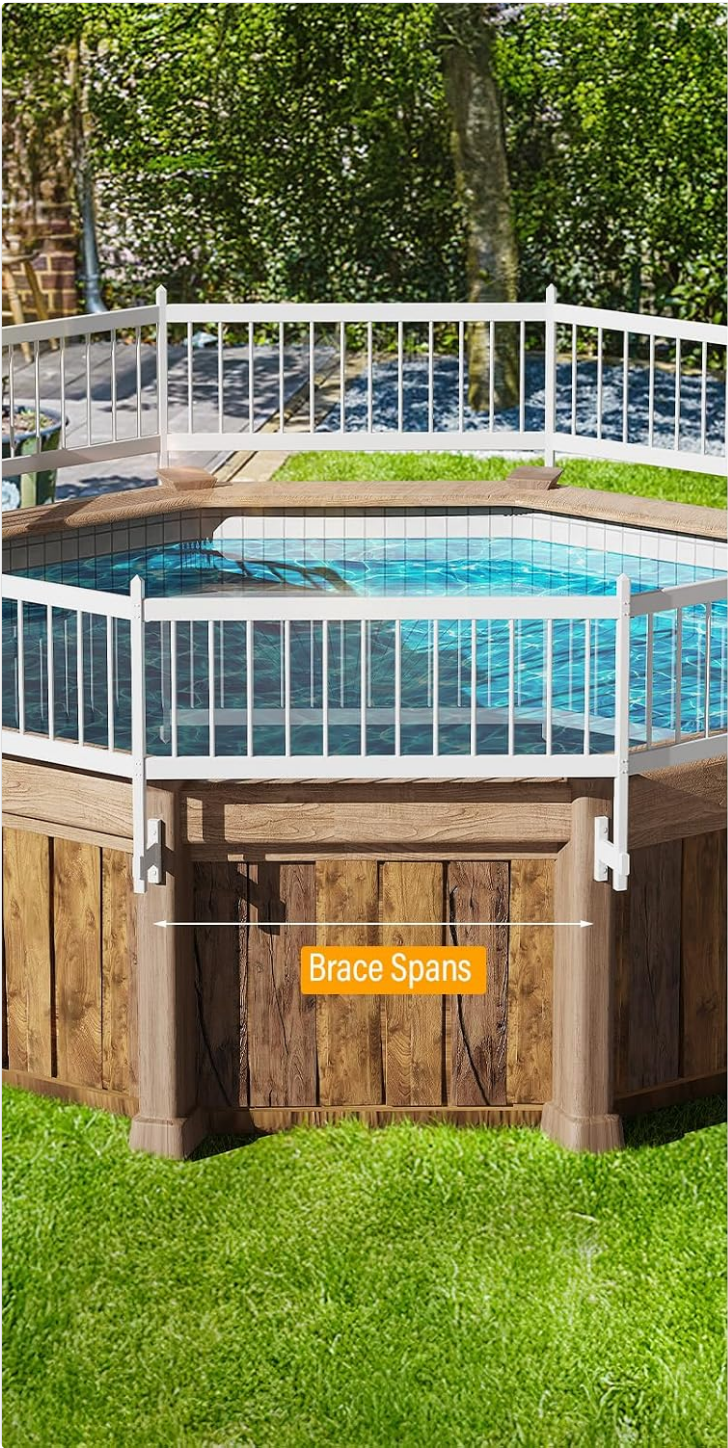

Your safety and the safety of others are paramount. This safety fence is intended to be a deterrent and a layer of protection, but it is not a substitute for constant adult supervision. Always supervise children and pets around the pool area.

- **Drowning Prevention:** The primary purpose of this fence is to help prevent accidental drowning. Ensure all sections are properly installed and secured at all times.
- **Child and Pet Safety:** Keep children and pets away from the pool area when unsupervised. The fence helps create a barrier but should be used in conjunction with other safety measures.
- **Unauthorized Access:** Ensure the fence is always closed and secured to prevent unauthorized entry into the pool area.
- **Regular Inspection:** Periodically inspect the fence for any damage, loose components, or signs of wear. Repair or replace damaged parts immediately.
- **Local Regulations:** Always check local building codes and regulations regarding pool fencing requirements in your area. This product may not meet all local requirements.

3. PACKAGE CONTENTS

Before beginning installation, verify that all components are present and undamaged. If any parts are missing or damaged, please contact VINGLI customer support.

4. INSTALLATION INSTRUCTIONS

Careful installation is crucial for the fence's effectiveness. Follow these steps for proper setup.

4.1 Tools Required (Not Included)

- Drill
- Level
- Measuring Tape
- Screwdriver
- Miter Saw (if customization/cutting of fence sections is required)
- Pilot drill bits (recommended for plastic components)

4.2 Pre-Installation Steps

1. **Measure Your Pool:** Determine the total perimeter of your pool and the number of brace spans. Refer to Image 2 for guidance on selecting the appropriate number of fence kits (Kit A, B, C) to match your pool's dimensions.
2. **Layout Planning:** Plan the layout of your fence sections. The fence can be customized to fit your specific pool shape (oval or round) and size.
3. **Inspect Components:** Before assembly, inspect all fence sections and hardware for any manufacturing defects or shipping damage.

4.3 Assembly and Mounting

1. **Attach Feet to Uprights:** Begin by attaching the fence feet to the pool uprights. It is highly recommended to use a level between the uprights to ensure a consistent and solid starting point around the entire pool. This helps avoid major adjustments later.
2. **Secure Fence Posts:** Use a drill to secure the fence posts to the pool columns. Drill pilot holes for all screws to prevent cracking the plastic components.
3. **Connect Sections:** Connect the individual fence sections using the provided hardware. Ensure all connections are tight and secure.
4. **Corner Reinforcement:** The fence features a stable structure fixed with corner nails/brackets. Ensure these are properly installed for maximum stability and security. Refer to Image 4 for a visual guide.
5. **Customization (if needed):** If your pool requires custom lengths, use a miter saw to carefully cut the top and bottom pieces of the fence sections to fit. Ensure clean cuts for a proper fit.
6. **Gate Installation (if applicable):** If you have purchased a gate section, install it according to the specific instructions provided with the gate kit. Note that a locking latch for the gate may need to be purchased separately, as it is not always included.
7. **Final Check:** Once all sections are installed, perform a thorough check to ensure all hardware is tightened, and the fence is stable and secure around the entire perimeter of the pool.

5. OPERATION

The VINGLI Above Ground Pool Safety Fence is designed for passive safety. Once installed, its primary function is to act as a physical barrier.

- **Maintaining the Barrier:** Ensure all fence sections remain securely attached to the pool columns.
- **Gate Usage (if applicable):** If a gate is installed, always ensure it is closed and latched when the pool is not in use or unsupervised. Consider adding a child-proof lock for enhanced security.
- **Containing Pool Items:** The fence also helps to keep pool toys and other items within the designated pool area, preventing them from floating away or being accessed from outside the fence.

EFFECTIVE FENCE BARRIER

☑ Prevents floating toys from getting out of the pool

☑ Keeps out unwanted entries

6. CARE AND MAINTENANCE

Regular care and maintenance will prolong the life of your pool safety fence and ensure its continued effectiveness.

- **Cleaning:** Clean the fence regularly with mild soap and water. Avoid abrasive cleaners or harsh chemicals that could damage the material. Rinse thoroughly with clean water.
- **Inspection:** Periodically inspect all fence posts, sections, and hardware for signs of wear, corrosion, cracks, or loosening. Pay close attention to areas exposed to direct sunlight or pool chemicals.
- **Tighten Fasteners:** Re-tighten any loose screws or fasteners as needed to maintain structural integrity.
- **Repair/Replace:** If any part of the fence becomes damaged or compromised, repair or replace it immediately to maintain the safety barrier. Do not use a damaged fence.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your VINGLI pool safety fence.

Problem	Possible Cause	Solution
Fence sections appear unstable or sway.	Loose fasteners; improper installation of corner brackets; plastic posts not thick enough to handle weight (especially for gates).	Ensure all screws and fasteners are tightened. Verify that corner nails/brackets are correctly installed. For gates, consider reinforcing mounting posts if sagging occurs.
Missing or broken parts upon delivery.	Shipping damage or packaging error.	Contact VINGLI customer support immediately for replacement parts. Do not attempt to install with missing or broken components.
Difficulty fitting fence sections to pool.	Incorrect measurements; sections not cut to size.	Re-measure your pool's brace spans. If necessary, use a miter saw to carefully cut fence sections to the required length. Ensure pilot holes are drilled before screwing.
