1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out on a clean, soft surface (e.g., carpet or blanket) to prevent scratches. Identify each part using the provided labels and the parts list in your manual.
2. **Attach Headboard Legs:** Secure the support legs to the upholstered headboard using the designated bolts and Allen wrench. Ensure they are tightened securely.
3. **Connect Side Rails to Headboard and Footboard:** Attach the upholstered side rails to the headboard and footboard using the appropriate hardware. Do not fully tighten all bolts until the entire frame is assembled to allow for minor adjustments.
4. **Install Center Support Bar:** Position the metal center support bar(s) within the frame. Attach any necessary support legs to the center bar(s) and adjust their height if needed to ensure even contact with the floor.
5. **Insert Wooden Slats:** Place the plastic slat holders onto the side rails and center support bar. Insert the wooden slats into these holders, ensuring they are evenly spaced and securely seated. The slats provide direct support for your mattress.
