SOYOK 1.0

SOYOK Cooling Towel User Manual

MODEL: 1.0

Introduction

The SOYOK Cooling Towels are designed to provide instant cooling and comfort during physical activities and in hot environments. Made from high-density microfiber, these towels are soft, breathable, and highly absorbent, facilitating rapid sweat evaporation to keep you cool. Each 4-pack includes towels in various colors, along with a waterproof carrying bag and carabiner for portability.

Product Features

- **High-Quality Material:** Constructed from high-density microfiber with a mesh structure, ensuring softness, comfort, breathability, and skin-friendly properties. Odorless and fade-resistant, designed for durability and reusability.
- **Efficient Sweat Absorption & Cooling:** Utilizes physical evaporation for cooling, absorbing sweat effectively to keep you dry. The rectangular shape (40" x 12") with precision seams allows versatile use around the head, neck, or wrist.
- **Portable Design:** Compact and easy to store. Each towel comes with a PVC waterproof carrying bag and a metal carabiner, making it convenient to attach to sports bags or travel backpacks.
- **Instant Cooling Activation:** Achieve rapid cooling in three simple steps: soak in water, wring out excess water, and shake 3-5 times. The cooling effect lasts for hours and can be reactivated by repeating the steps.
- **Versatile Use:** Ideal for swimming, running, fitness, yoga, travel, climbing, and various outdoor activities. A practical solution for staying cool in summer.

QUICK DRYING

- No water drop
- Thinner and cooler than other towels

OTHER 7.14 oz

VS

OURS 3.28 oz

Image description: An image illustrating the quick-drying property of the SOYOK cooling towel. Water is shown being poured over the towel, with text indicating "No water drop" and that it's "Thinner and cooler than other towels." A comparison shows the SOYOK towel (3.28 oz) is significantly lighter than other towels (7.14 oz).

Setup and First Use

To activate the cooling effect of your SOYOK Cooling Towel, follow these simple steps:

- 1. Soak It:** Fully immerse the cooling towel in water. Cold water is recommended for best results.
- 2. Wring It:** Wring out the excess water from the towel until it is damp but not dripping.
- 3. Shake It:** Hold the towel by its ends and shake it vigorously 3-5 times. This action initiates the evaporative cooling process.

Your towel is now activated and ready to provide instant cooling.

Cooling Towels

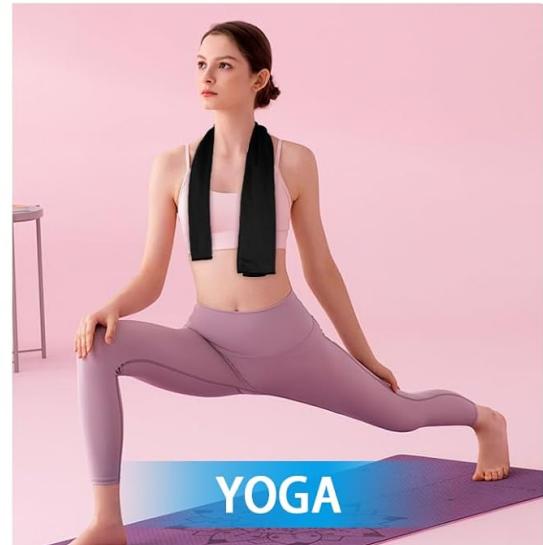

Image description: A visual guide demonstrating the three steps to activate the cooling towel: soaking it in water, wringing out the excess water, and shaking it to initiate cooling. The image also shows temperature readings before (52.0°C) and after (16.0°C) activation, highlighting the significant temperature drop.

Operating Instructions

Once activated, the SOYOK Cooling Towel can be used in various ways to provide relief from heat:

- **Around the Neck:** Drape the towel around your neck for continuous cooling, especially effective during workouts or outdoor activities.
- **On the Head/Forehead:** Fold and place the towel on your head or forehead to cool down quickly.
- **On Wrists/Pulse Points:** Wrap the towel around your wrists or other pulse points for targeted cooling.
- **As a Sweat Towel:** Use it to wipe away sweat during exercise, benefiting from its super absorption capacity.

The cooling effect can last for hours. If the towel starts to warm up, simply re-soak, wring, and shake it to reactivate the cooling.

Maintenance and Care

To ensure the longevity and effectiveness of your SOYOK Cooling Towels, please follow these care instructions:

- **Machine Washable:** The towels can be machine washed. Use cold water and a gentle cycle.
- **Do Not Bleach:** Avoid using bleach or harsh detergents, as this can damage the microfiber material and

affect its cooling properties.

- **Air Dry Recommended:** For best results, air dry the towels. Tumble dry on low heat if necessary.
- **Storage:** Store the towels in their provided waterproof bag when not in use, especially when damp, to maintain freshness and prevent odors.

Troubleshooting

- **Towel not cooling effectively?** Ensure the towel is thoroughly soaked and excess water is wrung out. Vigorously shaking the towel is crucial to initiate the evaporative cooling process.
- **Towel feels stiff after drying?** This is normal for microfiber. Re-soak the towel in water, and it will regain its softness.
- **Towel has an odor?** Wash the towel according to the maintenance instructions. Ensure it is completely dry before storing in the waterproof bag.
