2. WHAT'S IN THE BOX

Verify that all components are present in your package:

- Battery Powered Security Camera
- Mounting Kit (screws and anchors)
- Bracket
- User Manual (this document)

3. SETUP INSTRUCTIONS

3.1 Charging the Camera

Before initial use, fully charge the camera's built-in battery using a standard 5V USB charger (not included). The charging indicator light will typically turn solid when fully charged.

3.2 App Download and Account Creation

1. Download the "Vicohome" app from your smartphone's app store (iOS or Android).
2. Open the app and create a new account, or log in if you already have one.

3.3 Connecting to Wi-Fi

The MISECU CG6D camera supports **2.4GHz Wi-Fi networks only**. Ensure your smartphone is connected to a 2.4GHz Wi-Fi network during the setup process. 5GHz Wi-Fi is not supported.

1. In the Vicohome app, tap the "+" icon to add a new device.
2. Follow the on-screen instructions to power on the camera and scan the QR code displayed on your phone with the camera lens.
3. Once connected, the camera will indicate successful pairing, and you can name your device within the app.

3.4 Mounting the Camera

The camera can be wall-mounted, ceiling-mounted, or placed on a desktop. For outdoor installation, choose a location that provides the desired viewing angle and is within range of your 2.4GHz Wi-Fi network.

1. Mark the drilling spots using the mounting bracket as a template.
2. Drill holes and insert wall anchors if mounting on masonry or drywall.
3. Secure the bracket to the surface with the provided screws.
4. Attach the camera to the bracket and adjust the angle as needed.

4.2 Night Vision Modes

The camera offers two night vision modes:

- **Full-Color Night Vision:** Utilizes built-in spotlights to provide clear, colored images in low-light conditions.
- **Infrared Night Vision:** Uses infrared LEDs for black and white surveillance in complete darkness.

You can switch between these modes or set them to automatic within the app settings.

4.3 Motion Detection and AI Analysis

The camera features PIR motion detection and advanced AI analysis to identify people, vehicles, pets, and packages, reducing false alarms. When motion is detected, the camera can:

- Send instant alerts to your phone via the Vicohome app.
- Trigger a siren alarm (can be enabled/disabled in the app).
- Flash a white light (can be enabled/disabled in the app).
- Record video clips to cloud storage or an inserted SD card.

You can customize detection sensitivity and set specific activity zones within the app to focus monitoring on critical areas.

4.5 Storage Options

The camera supports both local Micro SD card storage (up to 128GB) and cloud storage. A free 3-day loop cloud storage plan is included for 2 years. Additional cloud storage and advanced AI features are available via subscription after a 30-day free trial.

5. MAINTENANCE

5.1 Battery Management

The camera's battery life can range from 1 to 5 months depending on usage, motion detection frequency, and environmental factors. Recharge the camera when the battery level is low, as indicated by the app. For optimal battery longevity, avoid extreme temperatures.

5.2 Cleaning

Periodically clean the camera lens and housing with a soft, damp cloth to remove dust, dirt, or water spots that may affect image clarity. Do not use harsh chemicals or abrasive materials.

5.3 SD Card Management

If using an SD card, regularly check its status in the app. Format the SD card periodically to maintain optimal performance and free up space. Back up important recordings before formatting.

6. TROUBLESHOOTING

6.1 Camera Not Connecting to Wi-Fi

- Ensure your Wi-Fi network is 2.4GHz. The camera does not support 5GHz Wi-Fi.
- Check the Wi-Fi signal strength at the camera's installation location. Move the camera closer to the router if the signal is weak.
- Verify that your Wi-Fi password is entered correctly in the app.
- Restart your router and the camera, then attempt to reconnect.

6.2 Frequent False Alarms

- Adjust the motion detection sensitivity in the Vicohome app.
- Define specific activity zones to exclude areas with irrelevant motion (e.g., public sidewalks, moving tree branches).
- Ensure AI analysis is enabled to differentiate between people, vehicles, and other objects.

6.3 Poor Image Quality

- Clean the camera lens to remove any smudges or dirt.
- Ensure adequate lighting for optimal image capture, especially at night.
- Check your Wi-Fi connection speed; a poor connection can affect streaming quality.

6.4 Battery Drains Quickly

- Reduce motion detection sensitivity or frequency of recordings.
- Ensure the camera is not in an area with constant motion, which triggers frequent recordings.
- Check for extreme temperatures, which can impact battery performance.
