MAINTENANCE

Fabric Care (Corduroy):

- **Regular Cleaning:** Vacuum regularly using an upholstery attachment to remove dust and loose debris.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. Avoid rubbing, as this can spread the stain. Use a mild fabric cleaner designed for corduroy, testing on an inconspicuous area first.
- **Avoid Harsh Chemicals:** Do not use bleach or abrasive cleaners, as these can damage the fabric.

Frame and Mechanism Care:

- **Frame:** Wipe the wooden and metal parts with a soft, damp cloth. Avoid excessive moisture.
- **Moving Parts:** Periodically check all bolts and screws to ensure they are tight. Lubricate moving parts of the pull-out mechanism if they become stiff, using a silicone-based lubricant.
- **Weight Capacity:** Adhere to the maximum weight capacity of 500 lbs to prevent damage to the frame and mechanism.

TROUBLESHOOTING

Difficulty Converting Sofa to Bed:

- **Check for Obstructions:** Ensure no objects are blocking the pull-out mechanism.
- **Even Pull:** Apply even pressure when pulling the bed mechanism out. Avoid pulling from just one side.
- **Lubrication:** If the mechanism feels stiff, apply a small amount of silicone lubricant to the moving joints.

USB Ports Not Functioning:

- **Power Connection:** Verify that the sofa's power cord is securely plugged into a working electrical outlet.
- **Cable Check:** Ensure your USB charging cable is not damaged and is properly connected to both the port and your device.
- **Device Compatibility:** Some devices may require specific charging protocols. Try a different device or cable to isolate the issue.

Sofa Feels Unstable:

- **Tighten Fasteners:** Check all assembly bolts and screws and tighten them if loose.
- **Level Surface:** Ensure the sofa is placed on a flat, level surface.
- **Legs:** Verify that all legs are securely attached and making full contact with the floor.
