## INSTALLATION INSTRUCTIONS

Follow these steps for simple and correct installation of your new shaver blades:

1. **Preparation:** Ensure your shaver is turned off and unplugged.
2. **Clean the Shaver:** Before installing new blades, thoroughly clean your shaver to remove any hair clippings or debris. Refer to your shaver's original manual for specific cleaning instructions.
3. **Remove Old Blades:** Carefully remove the existing shaver blades and foil. Consult your shaver's manual if you are unsure how to do this.
4. **Install New Blades:** Align the new UOnline911 replacement blades with the shaver head. Gently press them into place until they click securely. The installation process is designed to be straightforward.

5. **Reattach Foil (if applicable):** If your shaver uses a separate foil, reattach it securely over the new blades.

## OPERATING WITH NEW BLADES

Once the new blades are installed, your shaver is ready for use. For optimal shaving performance:

- Ensure your skin is clean and dry before shaving, or use a pre-shave lotion for wet shaving, depending on your shaver model.
- Hold the shaver at a right angle to your skin and move it against the direction of hair growth.
- Apply gentle pressure; excessive force is not necessary and can cause irritation or damage to the blades.
- For best results, shave regularly to maintain shorter stubble, which is easier for electric shavers to cut efficiently.

## MAINTENANCE AND CLEANING

Proper maintenance ensures the longevity and performance of your replacement blades:

- **Regular Cleaning:** After each shave, clean the shaver head and blades. Many Panasonic shavers are designed for easy cleaning under running water.

- **Thorough Cleaning:** Periodically, perform a more thorough cleaning by removing the blades and rinsing them separately to remove accumulated hair and skin particles.
- **Replacement Frequency:** For optimal performance, it is recommended to change your shaver's foil and cutter block every 18 months. Over this period, your shaver cuts millions of hairs, leading to gradual wear of the cutting parts, which can result in a less close and comfortable shave.

Image: The replacement blades are designed for easy cleaning, often under running water.

## TROUBLESHOOTING

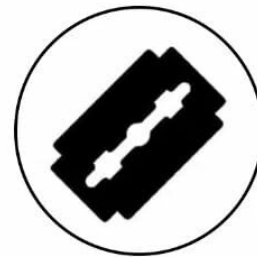

If you experience issues after installing your new blades, consider the following:

- **Poor Shave Quality:** If the shave is not as close or comfortable as expected, ensure the blades are correctly seated and the shaver head is clean. Verify that your shaver model is listed as compatible.
- **Irritation:** New blades can sometimes cause minor irritation initially. Ensure your skin is prepared correctly for shaving. If irritation persists, ensure the blades are clean and properly installed.
- **Noise:** Unusual noise might indicate improper installation. Re-check that the blades are securely clicked into place.

If problems persist, refer to your original shaver manual or contact USonline911 customer support.

## PRODUCT SPECIFICATIONS

- **Material:** Made of high-quality metal material, ensuring sturdiness and durability.
- **Workmanship:** Exquisite workmanship contributes to a longer service life for the blades.
- **Quality Assurance:** 100% brand-new, never utilized. All parts are tested and quality-controlled prior to shipment.
- **Package Contents:** 2x Shaver Blades Cutter.

Sharper blades

Made of high quality steel and exquisite workmanship, it can make the blade have a longer service life
