Tatub Floating Bed

Tatub Natural Queen Floating Bed Frame with LED Lights User Manual

Model: Floating Bed | Brand: Tatub

INTRODUCTION

Welcome to your new Tatub Natural Queen Floating Bed Frame. This manual provides detailed instructions for assembly, operation, maintenance, and troubleshooting to ensure a safe and enjoyable experience with your new bed frame. Please read this manual thoroughly before assembly and retain it for future reference.

IMPORTANT SAFETY INFORMATION

Adhering to these safety guidelines is crucial for preventing injury and damage to the product.

- **Weight Limit:** Do not exceed the maximum weight limit of **1000 lbs.** Exceeding this limit can compromise the structural integrity of the bed frame.
- **Toe Injuries:** Exercise caution around the bed frame to prevent toe injuries, as the floating design hides the support legs.
- **Secure Assembly:** Ensure all connections are securely fastened during assembly and periodically check for tightness. Loose connections can lead to instability.
- **Children and Small Parts:** Keep small parts and packaging materials away from children during assembly to

prevent choking hazards.

- **Level Surface:** Assemble and use the bed frame on a flat, level surface to ensure stability.

PACKAGE CONTENTS

Before beginning assembly, carefully unpack all components and verify that every part listed below is present and undamaged. If any parts are missing or damaged, please contact customer support immediately.

- Headboard/Footboard Sections
- Side Rails
- Metal Slat System
- Central Support Beam and Legs
- LED Light Strip with Power Adapter
- Remote Control for LED Lights
- Hardware Pack (screws, bolts, washers, Allen wrench)
- Instruction Manual

Beautiful Fluting Detail

For any decor style, from rustic to modern

SETUP AND ASSEMBLY INSTRUCTIONS

Assembly typically requires two adults. Follow these steps carefully to ensure proper and safe construction of your bed frame.

1. **Preparation:** Unpack all components and lay them out on a clean, soft surface (e.g., a rug or blanket) to prevent scratches. Identify all parts using the provided parts list in your hardware pack.
2. **Frame Assembly:** Attach the side rails to the headboard and footboard sections using the specified hardware. Initially, finger-tighten all bolts.
3. **Central Support:** Install the central support beam and its corresponding legs. Ensure these are positioned correctly for optimal weight distribution.

4. **Slat System Installation:** Place the metal slat system onto the assembled frame. Secure the slats as instructed in the detailed assembly diagram.
5. **Final Tightening:** Once the main frame is assembled and all components are in place, fully tighten all bolts with the provided Allen wrench. Do not overtighten, as this can strip screws or damage components.
6. **LED Light Strip Attachment:** Carefully attach the LED light strip to the designated area underneath the bed frame. Ensure the strip is securely adhered and the wiring is neatly tucked away to prevent damage or tripping hazards.
7. **Power Connection:** Connect the LED light strip to its power adapter and then plug the adapter into a standard electrical outlet.

OPERATING INSTRUCTIONS: LED LIGHTS

Your Tatub Floating Bed Frame includes integrated RGB LED lighting with multiple control options for customizable ambiance.

Remote Control Operation

- **Power On/Off:** Press the 'ON' button to activate the lights and 'OFF' to turn them off.
- **Color Selection:** Use the dedicated color buttons to select a static color (e.g., red, green, blue, white).
- **Brightness Adjustment:** Adjust the light intensity using the brightness up/down buttons.
- **Dynamic Modes:** Select various dynamic modes such as flash, fade, strobe, or smooth transitions using the mode buttons.

- **Remote Range:** Point the remote control directly at the LED receiver for optimal response.

Smartphone App Control

- **App Download:** Download the compatible smartphone application (refer to the LED light manual or product packaging for specific app details and QR codes).
- **Pairing:** Follow the in-app instructions to pair your smartphone or tablet with the LED lights via Bluetooth or Wi-Fi.
- **Advanced Features:** The app provides access to an extended range of over 60,000 color options, custom scene creation, timer functions, and music synchronization features.

CARE AND MAINTENANCE

Regular care will help maintain the appearance and longevity of your Tatub Floating Bed Frame.

- **Cleaning the Frame:** Wipe the bed frame with a soft, damp cloth. Avoid harsh chemicals, abrasive cleaners, or polishes that may damage the oak finish.
- **LED Lights:** Keep the LED light strip clean and free of dust. Do not submerge the light strip or power adapter in water. If cleaning is necessary, use a dry, soft cloth.
- **Hardware Check:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they remain tight. Retighten as necessary to maintain the bed frame's stability and prevent creaking.
- **Weight Distribution:** Distribute weight evenly across the bed frame to prevent undue stress on individual slats or frame components.
- **Avoid Moisture:** Protect the bed frame from excessive moisture and direct sunlight to prevent warping or fading of the wood finish.

TROUBLESHOOTING GUIDE

This section addresses common issues you might encounter. For problems not listed here, please contact customer support.

Problem	Possible Cause	Solution
LED lights not turning on	Power connection loose or adapter faulty	Check all power connections from the light strip to the wall outlet. Ensure the adapter is securely plugged into a working electrical outlet. Test the outlet with another device.
LED lights not responding to remote	Remote battery low or receiver blocked	Replace the remote control battery. Ensure there are no obstructions between the remote and the LED receiver unit.
Missing or incorrect parts during assembly	Manufacturing or packaging error	Contact Tatub customer support immediately with your purchase details, the specific part numbers, and a clear description of the missing or incorrect components. Do not attempt to force incompatible parts.
Bed frame feels unstable or creaks	Loose hardware or uneven surface	Retighten all bolts and screws on the frame. Ensure the bed frame is placed on a flat, level surface. Check that all support legs are properly installed and making firm contact with the floor.

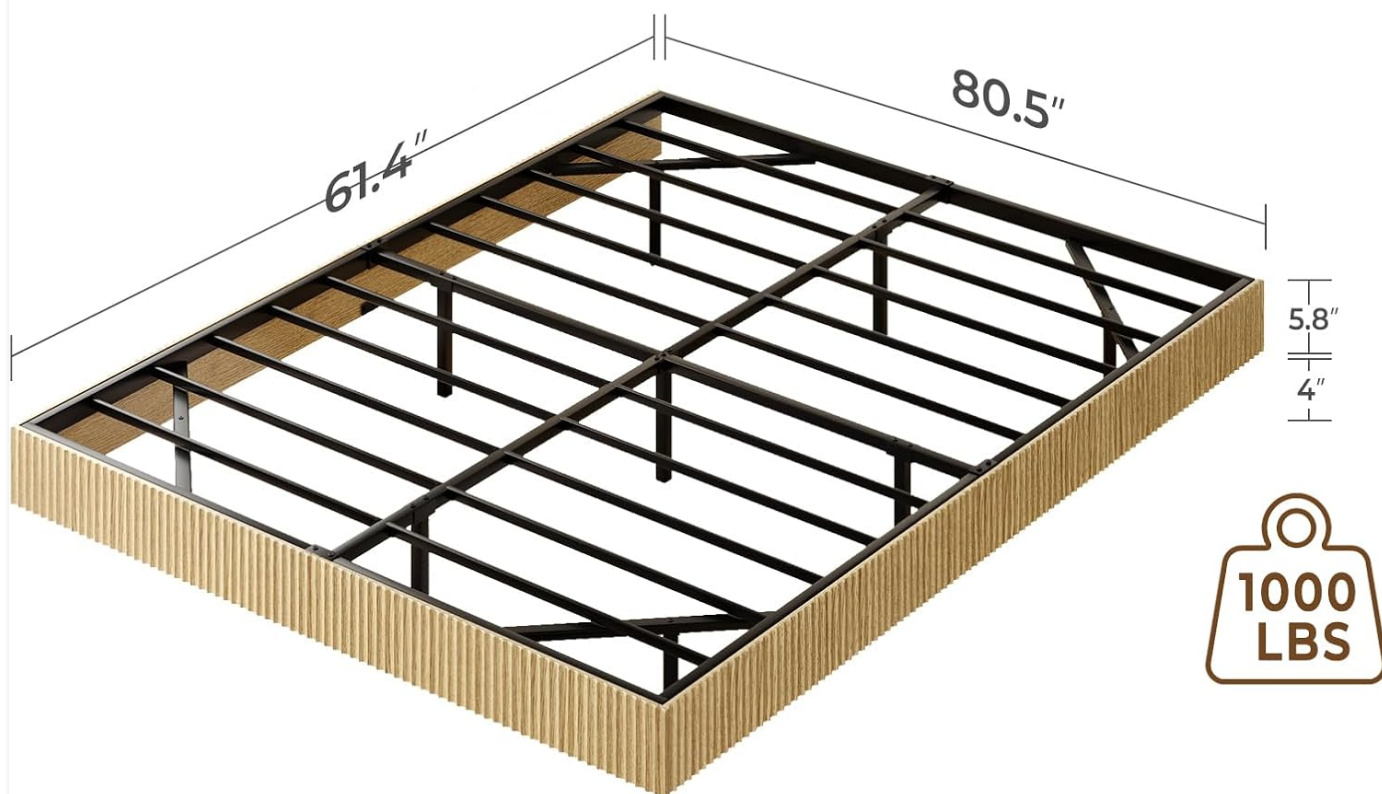

PRODUCT SPECIFICATIONS

Detailed specifications for the Tatub Natural Queen Floating Bed Frame.
