SETUP AND ASSEMBLY

The HYSEYY Double Rods Clothes Rack features an upgraded assembly method using threaded rolling connections, which simplifies the process and provides a more rigid connection compared to traditional screw mounting. All necessary tools are included.

Packing List

Packing List

Ensure all components listed in the packing list are present before beginning assembly. Each part is labeled for easy identification.

Assembly Steps

1. Unpack all components and verify against the packing list.
2. Identify the base frame components and attach the wheels (2 lockable, 2 common) to the designated points.
3. Assemble the vertical support rods by screwing them into the base.
4. Attach the lower horizontal rod to the vertical supports.
5. Attach the upper horizontal rod to the vertical supports.
6. Ensure all connections are securely tightened using the provided tools.

The smooth-rolling, lockable wheels ensure both effortless relocation and secure positioning of the garment rack.

MAINTENANCE

To ensure the longevity and optimal performance of your HYSEYY Double Rods Clothes Rack, follow these simple maintenance guidelines:

- **Regular Cleaning:** Wipe down the metal frame with a soft, damp cloth to remove dust and dirt. Avoid abrasive cleaners that could damage the finish.
- **Check Connections:** Periodically inspect all threaded connections to ensure they remain tight. Re-tighten if any looseness is detected to maintain stability.
- **Wheel Care:** Keep the wheels free of debris (hair, lint) to ensure smooth rolling. If wheels become stiff, a small amount of lubricant can be applied to the axles.
- **Load Management:** Adhere to the maximum load capacity of 210 lbs to prevent bending or damage to the rods and frame. Distribute weight evenly.

TROUBLESHOOTING

If you encounter any issues with your HYSEYY Double Rods Clothes Rack, refer to the following common troubleshooting tips:

- **Rack is Wobbly:**

- Ensure all threaded connections are fully tightened.
- Verify that the rack is on a flat, even surface.
- Check if the weight on the rack is evenly distributed.

- **Wheels Not Rolling Smoothly:**

- Check for any hair, lint, or debris caught in the wheels and remove it.
- Ensure the lockable wheels are disengaged (unlocked).
- Apply a small amount of silicone-based lubricant to the wheel axles if necessary.

- **Clothes Touching the Floor:**

- Utilize the higher rod for longer garments like dresses and coats.
- Ensure the rack is fully extended to its maximum height if adjustable.
