3. SETUP

3.1. Battery Installation (Car)

1. Locate the battery compartment on the underside of the RC car.
2. Use a screwdriver (often included) to open the battery compartment cover.
3. Insert the required batteries (refer to the car's specific battery type, typically AA or rechargeable packs) into the compartment, ensuring correct polarity.
4. Securely close the battery compartment cover with the screwdriver.

3.2. Battery Installation (Remote Control)

1. Locate the battery compartment on the back of the remote control.
2. Open the battery compartment cover.
3. Insert the required batteries (typically AA or AAA, check remote for specifics) into the compartment, observing correct polarity.
4. Close the battery compartment cover.

3.3. Pairing the Car and Remote

The 2.4GHz transmission frequency allows for interference-free operation. Typically, the car and remote will automatically pair when both are turned on. If pairing issues occur, ensure both devices are fully charged and within range.

6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe down the car after each use. Avoid water or harsh chemicals.
- **Storage:** Store the car and remote in a cool, dry place away from direct sunlight. Remove batteries from both the car and remote if storing for extended periods to prevent leakage.
- **Battery Care:** Always use the recommended battery types. Do not mix old and new batteries or different types of batteries.

7. TROUBLESHOOTING

- **Car not responding:**
 - Ensure both the car and remote control are switched ON.
 - Check if batteries in both devices are correctly installed and fully charged.
 - Verify that the car and remote are properly paired.
- **Reduced range or interference:**
 - Ensure no other 2.4GHz devices are operating nearby that could cause interference.
 - Move closer to the car to check if the range improves.
- **Car moves slowly:**
 - Replace or recharge the car's batteries.
 - Ensure the driving surface is smooth and free of obstacles.
