HEYVALUE K301

HEYVALUE Instant Baby Bottle Warmer

MODEL: K301

Introduction

This manual provides comprehensive instructions for the safe and efficient operation, maintenance, and troubleshooting of your HEYVALUE Instant Baby Bottle Warmer. Please read this manual thoroughly before first use and retain it for future reference.

Safety Information

- Always use purified or distilled water in the water tank to prevent mineral buildup.
- Do not immerse the main unit in water or any other liquid.
- Ensure the product is placed on a stable, flat, and heat-resistant surface.
- Keep out of reach of children.
- Unplug the appliance when not in use and before cleaning.
- Do not operate if the power cord or plug is damaged.
- This product is designed for household use only.

Product Overview

The HEYVALUE Instant Baby Bottle Warmer is designed to quickly and conveniently dispense water at precise temperatures for baby formula or other beverages. It features a detachable water tank for easy cleaning and a night light for convenience during nighttime feedings.

An illustrative view of the HEYVALUE Instant Baby Bottle Warmer dispensing water into a baby bottle, highlighting its compact design and internal lighting feature.

Works with Most Brands of Bottles

The warmer is designed to accommodate most standard baby bottle brands and sizes, with a clearance of approximately 6.5 inches from the dispensing spout to the base.

Setup

1. Unpack all components from the box.
2. Remove any packaging materials, including the deodorizer packet from the water tank.
3. Wash the detachable water tank and lid with warm, soapy water. Rinse thoroughly and dry completely before first use.

4. Place the main unit on a stable, flat, and dry surface.
 5. Fill the detachable water tank with purified or distilled water up to the MAX line.
 6. Place the filled water tank securely onto the base unit.
 7. Plug the power cord into a standard 120V electrical outlet.
-

Operating Instructions

The HEYVALUE Instant Baby Bottle Warmer is designed for quick and easy formula preparation, especially during nighttime feedings.

Keep Warm Day & Night

Feed Baby Anytime

The compact design allows for convenient placement, such as on a bedside table, ensuring warm water is always available.

Temperature Control

The warmer offers four adjustable temperature settings to suit different formula types and baby preferences:

- **98.6°F (Body Temperature):** Ideal for formula feeding, mimicking the temperature of natural breast milk.
- **104°F:** Suitable for slightly warmer drinking water.
- **122°F:** For warmer beverages or specific formula requirements.
- **158°F:** For very warm water, suitable for adult beverages or specific needs.

4 Adjustable Temps for Different Formula

Rotate the central dial to select your desired temperature. The indicator light will illuminate to show the selected setting.

Dispensing Water

Once the desired temperature is reached (indicated by the light turning solid), place your baby bottle or cup under the dispensing spout.

Make Formula Instantly

Dispense

Scoop

Mix

To dispense, simply press and hold the dispensing button. The night light will activate, illuminating the bottle for clear visibility. Release the button when the desired amount of water is dispensed.

Night Light Feature

The integrated night light illuminates the dispensing area, making it easy to prepare bottles in low-light conditions without disturbing others.

Night Light Makes Night Feeding A Breeze!

The soft glow of the night light provides sufficient visibility for accurate dispensing and helps comfort a baby during nighttime feedings.

Maintenance and Cleaning

Regular cleaning ensures optimal performance and hygiene of your HEYVALUE Instant Baby Bottle Warmer.

Detachable Water Tank

The water tank is easily removable for thorough cleaning.

Easy to Clean

Detachable Water Tank

To clean, simply lift the water tank from the base. Wash it with warm, soapy water, rinse thoroughly, and allow it to air dry completely before reattaching.

Descaling

Over time, mineral deposits may accumulate in the water tank. Use the provided stain remover packet or a descaling solution (e.g., white vinegar diluted with water) to clean the tank. Follow the instructions on the descaling product for best results. Rinse thoroughly after descaling.

Exterior Cleaning

Wipe the exterior of the unit with a damp cloth. Do not use abrasive cleaners or immerse the unit in water.

Troubleshooting

- **No power:** Ensure the power cord is securely plugged into a working outlet. Check if the outlet has power.
- **Water not heating:** Verify that the water tank is properly seated and filled with water. Ensure the temperature setting is correctly selected.
- **Slow dispensing:** Check for any blockages in the dispensing spout. Ensure the water tank is filled to an adequate level.
- **Unusual odor/taste:** Ensure only purified or distilled water is used. Thoroughly clean the water tank and all components.

If issues persist, please contact customer support.

Specifications

Feature	Detail
Model No.	K301
Rated Voltage	120V
Rate Power	400W
Capacity	1 L
