SETUP AND INSTALLATION

The Yakry Baby Car Camera ZD23 is designed for easy installation without the need for special tools. Follow these steps for proper setup:

1. Camera Installation

- Secure the Camera:** Attach the baby car camera to the headrest of the rear seat using the provided straps. Ensure the camera is securely fastened and positioned to capture a clear view of your child.
- Adjust Camera Angle:** The camera features a 360° rotation capability. Adjust the camera to achieve the optimal viewing angle for monitoring your child.

2. Monitor Installation

1. **Choose Mounting Location:** The 7-inch monitor can be mounted on either the windshield or the dashboard using the provided bracket. Select a location that offers a clear view without obstructing your driving.
2. **Secure the Monitor:** Attach the monitor bracket to your chosen location. Ensure it is firmly secured.
3. **Connect Cables:** Connect the video cable from the camera to the monitor. Then, connect the car charger adapter to the monitor and plug it into your vehicle's 12V power outlet.

OPERATING INSTRUCTIONS

The Yakry Baby Car Camera ZD23 features a user-friendly touchscreen interface for easy operation.

1. Power On/Off

The monitor will automatically power on when the vehicle starts and power off when the vehicle is turned off, provided it is connected to a switched power outlet.

2. Touchscreen Interface

Navigate through the monitor's functions using the sensitive 7-inch touchscreen. The main screen typically displays options for Monitor, Files, and Settings.

3. Monitoring Your Child

- **Live View:** Select the "Monitor" option to view the live feed from the baby car camera.
- **3X Zoom:** Use the zoom function on the touchscreen to magnify the view of your child up to 3 times for a clearer look.
- **Night Vision:** The camera automatically activates 940nm IR night vision in low-light conditions, providing clear visibility without disturbing your child.

4. Recording and Playback

- **Recording:** The camera supports loop recording. Ensure an SD card is inserted to utilize this feature. You can initiate recording and take photos directly from the monitor.
- **Playback:** Access recorded videos and photos by selecting the "Files" option on the main menu.

Loop Video Recording

**Every Smile Recorded,
Every Mile Worry-Free**

**No Precious
Moment
Unreviewed**

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the monitor screen and camera lens. Avoid abrasive cleaners or solvents.
- **Cable Management:** Ensure all cables are neatly tucked away and not interfering with vehicle operation or passenger movement.
- **Storage:** If storing the device for an extended period, disconnect it from power and store it in a cool, dry place.

TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|----------------------------|---|--|
| Monitor does not power on. | No power, loose connection, faulty car charger. | Check car charger connection and vehicle's 12V outlet. Ensure the vehicle is running or the outlet is powered. |

| | | |
|------------------------------|---|---|
| No image on screen. | Camera not connected, faulty video cable, camera obstruction. | Verify the video cable is securely connected between the camera and monitor. Check for any obstructions blocking the camera lens. |
| Recording not working. | No SD card, full SD card, faulty SD card. | Insert a compatible SD card. Format the SD card if it's new or full. Replace the SD card if it's faulty. |
| Poor image quality at night. | Night vision not active, camera lens dirty. | Ensure night vision is enabled (usually automatic). Clean the camera lens. |

WARRANTY AND SUPPORT
