4. MAINTENANCE

4.1 Cleaning

Regularly clean the projector lens and exterior with the provided cleaning cloth. Ensure the projector is turned off and unplugged before cleaning. Do not use liquid cleaners directly on the lens.

4.2 Lamp Life

The projector lamp has an estimated lifespan of 65,000 hours, providing extended use without the need for frequent replacement.

5. TROUBLESHOOTING

• No Image/Signal:

1. Ensure all cables (HDMI, USB) are securely connected.
2. Verify the correct input source is selected on the projector.
3. For wireless connections, ensure both devices are on the same Wi-Fi network and screen mirroring is enabled.

activated correctly.

- **Blurry Image:**

1. Adjust the motorized focus using the remote control until the image is sharp.
2. Ensure the projection surface is flat and the projector is stable.

- **Distorted Image (Trapezoid Shape):**

1. The projector features automatic keystone correction. If manual adjustment is needed, refer to the display settings in the projector menu.

- **No Audio:**

1. Check the volume level on both the projector and the connected source device.
2. If using external Bluetooth speakers, ensure they are properly paired and connected.
3. If using wired connections, ensure the audio output is correctly configured on the source device.

- **Streaming Service Issues (e.g., Netflix, Hulu):**

1. Due to copyright restrictions, some streaming services may not be directly supported via screen mirroring from certain devices. For optimal compatibility and performance with streaming apps, it is recommended to use an external streaming device such as a Fire TV Stick, Roku, or Apple TV connected via HDMI.

- **Remote Control Not Working:**

1. Ensure the batteries are correctly inserted and not depleted.
2. Point the remote directly at the projector's IR receiver.
