## Master Lock MAS1430

# Master Lock MAS1430 40mm Set-Your-Own Combination Padlock

Model: MAS1430

## INTRODUCTION

---

This manual provides instructions for the Master Lock MAS1430 40mm Set-Your-Own Combination Padlock. This padlock features a durable brass finish body, a chrome-coated steel shackle, and a customizable 4-digit combination for security. It is designed for various applications including self-storage units, toolboxes, and lockers.

## PRODUCT OVERVIEW

---

*Image: Master Lock 40mm combination padlock securing a wooden cabinet. The padlock has a brass finish and four visible combination dials. The cabinet features a mesh-fronted section on the left, showing items stored inside.*

The Master Lock MAS1430 is a robust combination padlock with a 40mm wide brass body. Its shackle, made of chrome-coated steel, has a diameter of 6mm and a vertical clearance of 26mm, providing resistance against cutting and prying. The lock's 4-digit combination mechanism allows users to set their own code for personalized security.

## **SETUP: SETTING YOUR COMBINATION**

---

Your padlock is factory preset to 0-0-0-0. Follow these steps to set your own unique combination:

1. Open the padlock by ensuring the dials are set to the factory preset combination (0-0-0-0) and pulling up the shackle.
2. Rotate the shackle 90 degrees counter-clockwise (or clockwise, depending on the model) until it aligns with the notch on the lock body.
3. Press the shackle down firmly into the lock body. Hold it in this position.
4. While holding the shackle down, set your desired 4-digit combination by rotating the dials. Ensure the numbers are clearly aligned with the indicator line.
5. Release the shackle.

6. Rotate the shackle back to its normal closed position.
7. Scramble the dials to lock the padlock. Your new combination is now set.

**Important:** Write down your new combination and store it in a safe, memorable place. There is no master key or override code to retrieve a forgotten combination.

## OPERATING THE PADLOCK

---

### To Open:

1. Rotate the dials to your personal 4-digit combination.
2. Pull up on the shackle to release it from the lock body.

### To Close:

1. Insert the shackle back into the lock body.
2. Scramble the dials to a random set of numbers. This secures the padlock.

## MAINTENANCE

---

To ensure the longevity and smooth operation of your Master Lock padlock, consider the following maintenance tips:

- **Cleaning:** Periodically wipe the lock body and shackle with a soft, dry cloth to remove dirt and grime. Avoid harsh chemicals that may damage the finish.
- **Lubrication:** If the dials become stiff or the shackle is difficult to open/close, apply a small amount of graphite lubricant or a silicone-based spray into the shackle openings and around the dials. Do not use oil-based lubricants as they can attract dust and debris.
- **Environmental Protection:** While the padlock is designed for durability, prolonged exposure to extreme weather conditions (e.g., heavy rain, freezing temperatures) can affect its performance. Consider using a protective cover if used outdoors in harsh environments.

## TROUBLESHOOTING

---

- **Forgotten Combination:** If you forget your combination, there is no way to reset or retrieve it without knowing the original code. The lock will need to be cut or replaced. Master Lock does not retain user combinations.
- **Dials are Stiff or Hard to Turn:** Apply a small amount of graphite lubricant or a silicone-based spray to the dials and work them back and forth to distribute the lubricant.
- **Shackle is Stuck:** Ensure the combination is correctly aligned. If it still doesn't open, try applying lubricant to the shackle mechanism. If the issue persists, the lock may be damaged.

## SPECIFICATIONS

---

<b>Brand</b>	Master Lock
<b>Model Number</b>	MAS1430
<b>Body Width</b>	40 mm (1.57 inches)
<b>Shackle Diameter</b>	6 mm (0.24 inches)
