Maintenance

To maintain the quality and appearance of your Feonase bed frame, follow these care instructions:

- **Fabric Care:** The upholstered headboard and frame should be dry cleaned only. Avoid using liquid cleaners or harsh chemicals, as these may damage the fabric.
- **Frame Cleaning:** Wipe the metal frame components with a soft, damp cloth. Avoid abrasive cleaners.
- **Regular Inspection:** Periodically check all bolts and connections to ensure they are tight. Retighten if necessary to maintain stability.

Troubleshooting

If you encounter any issues with your bed frame, refer to the following common solutions:

- **Squeaking Noises:** The bed frame is designed with EVA mute strips to reduce noise from friction between the slats. If squeaking occurs, ensure all slats are properly seated and all frame connections are tightened.

- **Unstable Frame:** Check all leg and frame connections. Ensure they are securely fastened according to the assembly instructions. Uneven flooring can also contribute to instability; consider using furniture pads to level the bed.
- **Charging Station Not Working:** Verify that the power cord for the charging station is securely plugged into a functional wall outlet. Check all USB and AC connections.
