Qiyuan IPX6 Outdoor Power Strip 6FT 3 Outlets

Qiyuan IPX6 Outdoor Power Strip Weatherproof Surge Protector User Manual

Model: IPX6 Outdoor Power Strip 6FT 3 Outlets

1. Introduction

Thank you for choosing the Qiyuan IPX6 Outdoor Power Strip. This device is designed to provide reliable power distribution and surge protection in various environments, including outdoor settings. Its robust construction and safety features ensure dependable performance for your electrical devices.

2. Safety Information

Please read all safety instructions carefully before using this product. Failure to follow these instructions may result in electric shock, fire, or property damage.

- **IPX6 Waterproof Rating:** This power strip is engineered to resist rain, splashes, and flowing water. It is **not** suitable for full submersion in water (non-IPX8). Ensure drainage holes are clear to allow water to exit safely.
- **Overload Protection:** The unit features an auto shut-off mechanism when power exceeds 1875 W / 15 A to prevent damage to connected devices and the power strip itself.
- **Surge Protection:** Equipped with a 9-point safety system to protect against power surges.
- **Child Safety Protection:** Patented safety lock mechanism requires over 75N of force to open, preventing accidental insertions by children.
- **Flame-Retardant Material:** Constructed with heat-resistant ABS+PC material capable of withstanding temperatures up to 1382°F (750°C).

- **Electric Shockproof:** Designed with features to minimize the risk of electric shock.
- Do not disassemble or modify the power strip.
- Ensure the total power consumption of connected devices does not exceed the maximum rating of the power strip.

3. Product Features

- **3 Wide-Spaced AC Outlets:** Designed to accommodate large adapters without blocking adjacent outlets.
- **6-Foot Extension Cord:** Provides extended reach for flexible placement.
- **Rotatable Cable:** The power cord connection point can rotate for convenient positioning.
- **Covered Power Switch:** Protects the switch from environmental elements.
- **Wall Mountable:** Features pre-drilled holes on the back for easy wall or desktop installation.
- **Durable Construction:** Made with ETL-certified 16AWG heavy-duty cables and reinforced joints.

Image 3.2: Wide spacing between outlets for large adapters.

4. Setup

4.1 Placement

- Choose a location that is suitable for the IPX6 rating. The power strip is designed for outdoor use and can withstand rain, splashes, and water flow.
- Avoid placing the power strip in areas where it could be fully submerged in water.
- Ensure the power cord is not stretched or pinched.

4.2 Wall Mounting (Optional)

The power strip can be mounted on a wall or other flat surface using the pre-drilled holes on the back.

1. Identify the desired mounting location.

2. Mark the positions for screws using the mounting holes as a template.
3. Install appropriate screws (not included) into the wall, leaving a small gap for the power strip to slide onto.
4. Align the mounting holes on the back of the power strip with the installed screws and slide the power strip down to secure it.

Image 4.1: Wall mounting holes on the back of the unit.

4.3 Connecting Devices

Plug your electrical devices into the AC outlets. The wide spacing allows for larger power adapters.

5. Operating Instructions

5.1 Powering On/Off

The power strip features a covered power switch. Press the switch to turn the power strip on or off. The switch will illuminate when the power strip is on.

Image 5.1: Power switch and overload reset button.

5.2 Overload Protection Reset

If the power strip experiences an overload (total power consumption exceeds 1875 W / 15 A), the overload protection will automatically trip, and the power strip will shut off. To reset:

1. Unplug some devices to reduce the load.
2. Press the reset button (often integrated with the power switch) to restore power.

6. Maintenance

- **Cleaning:** Ensure the power strip is unplugged before cleaning. Use a dry, soft cloth to wipe the surface. Do not use liquid cleaners or immerse the unit in water.
- **Inspection:** Regularly inspect the power strip and cord for any signs of damage, such as cuts, fraying, or discoloration. If damage is found, discontinue use immediately and replace the unit.
- **Drainage Holes:** Periodically check and clear any debris from the drainage holes to ensure proper water runoff.

7. Troubleshooting

- **No Power to Devices:**
  - Check if the power strip's main switch is in the 'ON' position and illuminated.
  - Verify that the power strip is securely plugged into a functioning wall outlet.
  - Check if the overload protection has tripped (refer to Section 5.2 for reset instructions).
  - Ensure the total wattage of connected devices does not exceed the power strip's maximum capacity.
- **Plugs Feel Loose:**

- The power strip features a patented safety lock mechanism designed for a secure connection. Ensure plugs are inserted firmly.

- **Water Inside the Unit:**
  - While IPX6 rated, this unit is not for submersion. If water has entered the unit beyond its protective capabilities, immediately unplug it and discontinue use. Allow it to dry completely in a safe, dry environment before considering further use, or replace it if damage is suspected.

8. Specifications

Brand	Qiyuan
Model	IPX6 Outdoor Power Strip 6FT 3 Outlets
Total Power Outlets	3
Cord Length	6 feet
Waterproof Rating	IPX6 (Resistant to rain, splashes, and water flow; not for submersion)
Special Features	Child Safety Protection, Electric Shockproof, Flame-Retardant, Surge Protection
Recommended Uses	Indoor/Outdoor
Material	Heat-resistant ABS+PC
Certifications	UL Listed, ETL Certified 16AWG Heavy-Duty Cable
Item Weight	15.8 ounces
Dimensions	9.29 x 4.72 x 1.85 inches (Package)

9. Warranty and Support

For warranty information, technical support, or customer service inquiries, please refer to the manufacturer's official website or contact their customer support directly. Details are typically provided with your product packaging or on the Qiyuan brand store page.
