- Place the bed frame on a level surface to prevent instability.

Assembly typically requires two adults and can be completed in under an hour. Clear a spacious area for assembly and lay out all components on a soft, clean surface to prevent scratches.

1. **Attach Side Rails to Headboard:** Align the side rails with the pre-drilled holes on the headboard. Insert bolts and tighten them securely using the provided Allen wrench.
2. **Attach Side Rails to Footboard:** Repeat the previous step to attach the other end of the side rails to the footboard. Ensure the bed frame is stable and square.
3. **Install Center Support Beam:** Place the center support beam along the length of the bed frame, connecting it to the headboard and footboard brackets. Secure with bolts.
4. **Attach Support Legs to Slats:** If your slats require individual support legs, attach them now according to the instructions provided with the hardware.
5. **Place Wooden Slats:** Distribute the wooden slats evenly across the bed frame, resting them on the side rail ledges. Secure them in place if there are pre-drilled holes or fasteners.
6. **Final Check:** Ensure all connections are tight and the bed frame is stable before placing your mattress.

5. USAGE AND COMPATIBILITY

Mattress Compatibility

This platform bed frame is designed to support mattresses ranging from 10 to 16 inches in thickness. A box spring is not required due to the robust slat support system.

Adjustable Mattress Base Compatibility

The YUMPIE Queen Bed Frame is compatible with adjustable mattresses. To accommodate an adjustable base, the wooden slats must be removed. The adjustable base will then sit directly within the bed frame's side rails.
