VEVOR KD9942

# VEVOR 22-inch Tapered Tall Outdoor Planters Instruction Manual

## PRODUCT DESCRIPTION

The VEVOR 22-inch Tapered Tall Outdoor Planters are designed for both indoor and outdoor plant display. Crafted from durable polypropylene (PP) material, these planters are built to withstand various weather conditions, resisting fading and cracking. Each planter features a modern, elegant design with a unique striped pattern, enhancing the aesthetic of any space. A built-in planting box and an efficient drainage system ensure optimal plant health and ease of use. The planters are delivered ready to use, requiring no assembly.

## KEY FEATURES

- **Durable PP Material:** Constructed from sturdy polypropylene, these planters are weather-resistant, preventing fading and cracking.
- **Built-In Planting Box:** Includes a convenient inner planting box, allowing for potted plants or direct soil planting without filling the entire planter.
- **Efficient Drainage System:** Equipped with drainage holes to prevent overwatering and promote healthy root growth.
- **Stylish Design:** Features a unique striped pattern and tapered shape that complements modern and rustic decor.
- **No Assembly Required:** Ready for immediate use upon unboxing.

## PACKAGE CONTENTS

- 2 x Tall Planters
- 2 x Inner Pots
- 4 x Clips (for inner pot handles)
- 1 x User Manual

## SPECIFICATIONS

Attribute	Detail
Model Number	KD9942
Material	Polypropylene (PP)
Color	Black-tapered
Style	Tapered 22 inch
Shape	Square
Indoor/Outdoor Usage	Outdoor
Mounting Type	Floor Standing
Product Dimensions	12"D x 12"W x 22"H (300 x 300 x 570 mm)
Item Weight	10.41 Pounds (4.72 kg)
Included Components	2 x Planter, 2 x Inner Pots, 4 x Clips

## SETUP INSTRUCTIONS

The VEVOR Tall Outdoor Planters are designed for quick and easy setup, requiring no tools or complex assembly. Simply unbox and prepare for planting.

### Installing Inner Pots and Handles

Each tall planter comes with a removable inner planting pot. This inner pot is designed to fit snugly inside the main planter, reducing the amount of soil needed and making plant changes easier. The inner pots also include small, removable handles (clips) that can be inserted into designated holes on the sides of the inner pot. These handles facilitate lifting the inner pot out of the main planter for maintenance or seasonal changes.

Video: Demonstrates the unboxing process, separation of the outer and inner pots, and installation of the removable handles on the inner pot.

## USAGE GUIDELINES

### Planting

Once the inner pot is in place, fill it with your desired potting mix. You can plant directly into the inner pot or place a pre-potted plant inside. Consider adding a layer of lightweight filler (e.g., gravel or packing peanuts) at the bottom of the main planter, beneath the inner pot, to add stability if needed, especially for outdoor use in windy conditions.

Image: A person planting a small bush into the VEVOR planter.

## Drainage System

The inner pot is equipped with an efficient drainage system to prevent water accumulation and ensure proper aeration for plant roots. Excess water will drain through the holes in the bottom of the inner pot and collect in the base of the outer planter. This design helps to prevent root rot and maintain a healthy environment for your plants.

Image: Diagram of the built-in drainage system.

## Placement

These versatile planters are suitable for both indoor and outdoor use. Their durable construction makes them ideal for outdoor environments such as front porches, patios, and gardens. Indoors, they can add a stylish accent to living rooms, offices, or entryways.

Image: Examples of stylish placement in indoor and outdoor settings.

## CARE AND MAINTENANCE

### Cleaning

To clean the planters, simply wipe them down with a damp cloth. For more thorough cleaning, especially after seasonal use, remove the inner pot and wash both components with mild soap and water. Rinse thoroughly and allow to dry before replanting or storing.

### Storage

For off-season storage, the planters are designed to nest within each other, saving space. Remove the inner pots, clean both components, and then place the smaller outer planter inside the larger one. Store in a dry, protected area

to prolong their lifespan.

Video: Shows the nesting capability of the planters for compact storage.

## TROUBLESHOOTING

- **Water Accumulation:** Ensure the drainage holes in the inner pot are clear. If using outdoors in heavy rain, consider drilling additional small holes in the very bottom of the outer planter for extra drainage, especially if the inner pot is not elevated.
- **Planter Instability:** For lightweight plants or in windy conditions, add heavy rocks or sand to the bottom of the outer planter (below the inner pot) to increase stability.
- **Inner Pot Not Fitting:** Ensure the inner pot is correctly aligned and gently push it into place. The clips for the handles should be inserted into the designated slots on the inner pot's rim.

## WARRANTY AND SUPPORT

For warranty information or product support, please refer to the contact details provided with your purchase or visit the official VEVOR website. Keep your purchase receipt for any warranty claims.
