DELTA 58651

Delta Faucet In2ition 2-in-1 Dual Shower Head with ProClean Spray

Model: 58651

PRODUCT OVERVIEW

The Delta In2ition Two-in-One Shower system features a detachable hand shower that can be used independently or simultaneously with the main shower head. This design offers flexibility, allowing water flow from the shower head only, the hand shower only, or both at once. The system incorporates Delta's Touch-Clean spray holes for easy mineral residue removal and ProClean spray for efficient cleaning of shower surfaces.

This shower head is designed to provide 3X more coverage than a standard shower head through H2Okinetic PowerDrench Spray technology, creating a unique wave pattern and larger water droplets for enhanced intensity and warmth. The pause setting helps conserve water during shower tasks.

SETUP AND INSTALLATION

Installation of the Delta In2ition shower head is designed to be straightforward, typically completed in minutes without requiring complex plumbing work. Ensure you have plumber's tape and a towel available before beginning.

Installation Steps:

1. **Prepare the Shower Arm:** Clean any excess material from the threads of your existing shower arm.
2. **Apply Plumber's Tape (Optional but Recommended):** Wrap plumber's tape clockwise around the threads of the shower arm. Ensure the tape remains within the threads to prevent water flow blockage.
3. **Attach the New Shower Head:** Hand-tighten the new Delta In2ition shower head onto the shower arm by turning it clockwise. Do not use a wrench or pliers for this step, as overtightening can damage the unit.
4. **Check for Leaks:** Once installed, turn on the water supply and inspect all connections for any leaks.

OPERATING INSTRUCTIONS

The Delta In2ition 2-in-1 Dual Shower Head offers versatile functionality with seven distinct spray settings and the ability to use the shower head and hand shower together or separately.

Dual Functionality:

- **Shower Head Only:** Water flows exclusively from the main shower head.
- **Hand Shower Only:** Water flows exclusively from the detachable hand shower.
- **Both Simultaneously:** Water flows from both the main shower head and the hand shower for maximum coverage and flexibility.

7 Powerful Spray Options:

- **ProClean Spray:** A powerful, high-pressure spray designed for cleaning shower surfaces.
- **H2Okinetic PowerDrench Spray:** Provides 3X more coverage than standard sprays for a drenching experience.
- **Full Body Spray:** A consistent and invigorating full-coverage spray.
- **Massaging Spray:** A focused, pulsating spray for muscle relaxation.
- **Shampoo Rinsing Spray:** Optimized for efficient rinsing of shampoo.
- **Shampoo With Massage Spray:** Combines shampoo rinsing with a gentle massage.
- **Pause:** Reduces water to a trickle, allowing you to lather or shave without changing the water temperature.

7 SPRAY SETTINGS

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your Delta In2ition shower head.

Cleaning the Spray Holes:

The shower head features Delta's soft rubber Touch-Clean spray holes. To remove mineral residue and maintain spray performance, simply wipe the rubber nozzles with your finger or a soft cloth. No chemical cleaners or soaking are typically required.

Cleaning the Finish:

Delta Lumicoat finishes are designed to repel liquids and resist water spots, staying cleaner longer. To clean the finish, wipe with a soft, damp cloth. Avoid abrasive cleaners, solvents, or polishing agents, as these can damage the finish.

If you encounter issues with your Delta In2ition shower head, consider the following common troubleshooting steps:

- **Low Water Pressure:** Check if the water supply valves are fully open. Ensure the spray holes are clear of mineral buildup by using the Touch-Clean feature.
- **Leaks at Connection:** Verify that the shower head is hand-tightened securely to the shower arm. If plumber's tape was used, ensure it was applied correctly within the threads. If leaks persist, reapply plumber's tape or check the washer inside the connection.
- **Inconsistent Spray Pattern:** Clean the Touch-Clean spray holes to remove any blockages that may be affecting the spray.
- **Hand Shower Not Docking Securely:** Ensure the hand shower is properly aligned with the MagnaTite docking system on the main shower head.

For persistent issues, refer to the support section for contact information.
