PINDOWS PDS-650

PINDOWS Watch User Manual

Model: PDS-650

1. PRODUCT OVERVIEW

This manual provides essential information for the operation and maintenance of your PINDOWS Diamond Business Dress Analog Quartz Wrist Watch, Model PDS-650. This timepiece combines elegant design with reliable quartz movement, offering a sophisticated accessory for various occasions.

Front view of the PINDOWS watch, showcasing its blue dial, diamond accents, Roman numerals, and two-tone stainless steel band.

The PINDOWS watch worn on a wrist, complementing business attire, highlighting its elegant and professional appearance.

The PINDOWS watch presentation box, a black case with the brand logo in gold, indicating premium packaging.

Key features include a high-quality imported quartz movement for accurate timekeeping, a durable 316L stainless steel two-tone band, and a rhombic coated glass mirror. The watch also features a date display, luminous hands and markers, and 30M water resistance.

2. SETUP AND INITIAL USE

2.1 Unboxing

Carefully remove the watch from its packaging. Inspect the watch for any visible damage. The package should include the PINDOWS watch and this user manual.

2.2 Setting the Time and Date

1. **Pull out the Crown:** Locate the crown on the right side of the watch case. Gently pull the crown out to the first click position to set the date, or to the second click position to set the time.
2. **Setting the Date:** In the first click position, turn the crown clockwise or counter-clockwise to adjust the date. Avoid setting the date between 9 PM and 3 AM, as this may interfere with the automatic date change mechanism.

3. **Setting the Time:** In the second click position, turn the crown to move the hour and minute hands. Set the time to the desired hour, ensuring the AM/PM is correctly accounted for if setting the date.
4. **Push in the Crown:** Once the time and date are set, push the crown back into its original position against the watch case to start the watch movement.

3. OPERATING INSTRUCTIONS

3.1 Timekeeping

Your PINDOWS watch is equipped with a precise quartz movement, ensuring accurate timekeeping. The watch operates continuously once the crown is pushed in.

3.2 Date Display

The date window is located on the dial. The date will automatically advance once every 24 hours. If the watch has been stopped or the date is incorrect, refer to section 2.2 for manual adjustment.

3.3 Luminous Function

The hands and hour markers of your PINDOWS watch are treated with a luminous material. To activate the luminescence, expose the watch dial to a bright light source (natural or artificial) for a few minutes. The watch will then glow in low-light conditions, allowing for easy readability.

Illustration of the watch's luminous function, showing the hands and hour markers glowing in low light for enhanced visibility.

4. MAINTENANCE AND CARE

4.1 Water Resistance

Your PINDOWS watch is rated for 30 meters (3 ATM) water resistance. This means it is suitable for daily use, such as hand washing, splashes, and rain. It is **not suitable** for showering, bathing, swimming, diving, or any water sports. Avoid operating the crown or pushers when the watch is wet.

30 METERS WATERPROOF

Meet your daily waterproof needs, every second is just for you

Visual representation of the watch's 30-meter water resistance, suitable for splashes, hand washing, and rain.

4.2 Cleaning

To clean your watch, wipe the case and band with a soft, dry cloth. For the stainless steel band, a slightly damp cloth can be used, followed by a dry cloth. Avoid using chemical cleaners, solvents, or abrasive materials, as these can damage the watch's finish.

4.3 Battery Replacement

The quartz movement is powered by a battery designed to last 2-3 years. When the watch stops or the second hand begins to skip, it indicates a low battery. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and water resistance.

4.4 Storage

When not wearing your watch, store it in a cool, dry place, away from direct sunlight, extreme temperatures, and strong

magnetic fields. The original watch box is ideal for storage.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch not running or running intermittently.	<ul style="list-style-type: none">• Crown is pulled out.• Low battery.• Internal movement issue.	<ul style="list-style-type: none">• Push the crown fully back into the case.• Replace the battery (professional service recommended).• Contact customer support for repair.
