ZZHXSM 20-Piece Self-Adhesive Wall Plate Hangers Instruction Manual

Model: 37844-WPHDS-20

INTRODUCTION

This instruction manual provides detailed guidance for the proper installation, use, and maintenance of your ZZHXSM Self-Adhesive Wall Plate Hangers. Please read this manual thoroughly before use to ensure optimal performance and safety. Keep this manual for future reference.

The ZZHXSM wall plate hangers are designed to securely display decorative plates, pictures, and other lightweight wall art without the need for drilling. They feature a strong adhesive backing for easy application.

PRODUCT OVERVIEW

The ZZHXSM 20-Piece Self-Adhesive Wall Plate Hangers are crafted from high-quality plastic and stainless steel, ensuring both stability and durability. The triangular hooks are specifically designed to be rustproof and waterproof, providing long-lasting performance.

Each hanger is equipped with a strong self-adhesive backing, allowing for secure attachment to various clean, flat surfaces. This robust adhesive ensures a firm hold for your displayed items, minimizing concerns about detachment from properly prepared surfaces.

These hangers are ideal for displaying a variety of decorative plates, including art plates, vintage plates, ceramic plates, dinner plates, dessert plates, and shallow bowls. They are suitable for both round and square items, enhancing your home decor.

Beyond plates, these versatile hooks can be utilized for hanging pictures, photo frames, wall art, posters, and other lightweight decorative items. Their discreet design makes them suitable for various environments such as kitchens, offices, and bathrooms, offering practical and invisible support.

This package contains 20 individual self-adhesive hangers. Each hanger measures approximately 2.3 x 2.2 inches (57.6 x 5.7 cm). While lightweight and portable, they offer a high weight capacity. For heavier items, it is recommended to use two or more hangers to distribute the load effectively.

SETUP AND INSTALLATION

Follow these steps for proper installation of your self-adhesive wall plate hangers:

1. **Prepare the Surface:** Before installing the adhesive hook, ensure the surface is clean, dry, and free of dust, oil, or grease. Thoroughly dry the surface if it has been cleaned with a wet cloth.
2. **Remove Protective Film:** Carefully peel off the protective film from the back of the adhesive pad. Avoid touching the adhesive surface with your fingers to maintain its maximum stickiness.

Figure 2: Removing the protective film from the adhesive backing.

- 3. Apply the Hanger:** Firmly press the adhesive pad onto the desired clean surface. Apply consistent pressure for several seconds to ensure good contact and to remove any air bubbles trapped underneath.

Figure 3: Close-up of the adhesive hanger and hook mechanism.

4. **Curing Time:** Allow a minimum of 24 hours for the adhesive to fully cure and bond with the surface before hanging any items. This ensures maximum strength and prevents the hanger from detaching.

OPERATING AND USAGE

Once installed and cured, your ZZHXSM hangers are ready for use. Consider the following guidelines:

- **Item Placement:** Carefully place the item you wish to hang onto the triangular hook. Ensure the item is balanced and securely seated on the hook.
- **Weight Capacity:** While these hangers have a high weight capacity, it is crucial to assess the weight of your item. For heavier decorative plates or frames, use two or more hangers spaced appropriately to distribute the weight evenly.
- **Suitable Surfaces:** These hangers are designed for smooth, non-porous surfaces such as tiles, glass, metal, and smooth painted walls. Avoid applying to wallpaper, uneven, or freshly painted surfaces, as this may compromise adhesion or damage the surface upon removal.

MAINTENANCE

The ZZHXSM Self-Adhesive Wall Plate Hangers require minimal maintenance. To ensure their longevity and continued performance:

- **Cleaning:** If the hooks become dusty, gently wipe them with a soft, dry cloth. Avoid using abrasive cleaners or harsh chemicals, as these may damage the plastic or metal components.
- **Re-application:** Once an adhesive hanger has been applied and then removed, its adhesive properties may be significantly reduced. Re-using a hanger after removal is not recommended for secure attachment.

TROUBLESHOOTING

If you encounter issues with your ZZHXSM Self-Adhesive Wall Plate Hangers, consider the following:

- **Hanger Not Sticking:**
 - Ensure the surface was thoroughly cleaned and dried before application. Any dust, oil, or moisture will prevent proper adhesion.

- Verify the surface is smooth and non-porous. Adhesive hangers may not stick well to textured, porous, or wallpapered surfaces.
- Confirm that the protective film was fully removed and the adhesive was not touched excessively during application.
- Ensure sufficient pressure was applied during installation and the 24-hour curing time was observed before hanging items.

- **Item Falling Off:**

- Check if the item's weight exceeds the capacity of a single hanger. For heavier items, use multiple hangers.
- Re-evaluate the installation steps to ensure proper adhesion.

SPECIFICATIONS

| | |
|-------------------------------------|--|
| Model Number | 37844-WPHDS-20 |
| Manufacturer | ZZHXSM |
| Individual Hanger Dimensions | Approx. 2.3 x 2.2 inches (57.6 x 5.7 cm) |
| Package Dimensions | 7.87 x 5.51 x 0.47 inches |
