Setup and Assembly

Assembly of the iPormis King Bed Frame is designed to be straightforward. It is recommended to have two people for assembly, though it can be completed by one person. Estimated assembly time is approximately 30-45 minutes.

1. **Prepare the Area:** Clear a spacious area for assembly. Place all components on a soft, clean surface to prevent scratches.
2. **Identify Parts:** Unpack all components and identify them using the parts list in your instruction manual.
3. **Assemble the Headboard:** Attach the headboard legs to the upholstered headboard section. Ensure the charging station is correctly oriented.
4. **Construct the Frame:** Connect the side rails and footboard to the headboard. Loosely tighten screws initially.
5. **Install Support Beams and Slats:** Place the central support beam and then lay out the metal slats across the frame. Secure them according to the manual. The frame features noise-free rubber strips for quiet operation.

6. **Assemble Storage Drawers:** Construct the two storage drawers. These are designed with smooth wheels for easy access and sliding prevent Velcro to keep them in place.

Operating Instructions

Using the Charging Station

The integrated charging station provides convenient power access for your devices. It includes:

- 2 AC Outlets (110V/12A)
- 1 USB Port (5V/2A)
- 1 Type-C Port (5V/2A)

To use, simply plug the bed frame's power cord (6.6 feet) into a wall outlet. Then, connect your devices to the appropriate ports on the headboard. Always ensure the charging station is dry before use.

Utilizing Storage Drawers

The two under-bed storage drawers offer ample space for organizing items. They are equipped with smooth-rolling wheels for easy access and can be pulled out or pushed in as needed. Velcro strips help secure the drawers in place when not in use, preventing unwanted movement.

Maintenance

- **Cleaning the Frame:** Wipe metal parts with a soft, damp cloth. Avoid abrasive cleaners.
- **Cleaning Upholstery:** For the linen upholstered headboard, spot clean with a mild fabric cleaner as needed. Test on an inconspicuous area first.
- **Fastener Check:** Periodically (e.g., every 3-6 months) check all bolts and screws and re-tighten them to ensure the bed frame remains stable and noise-free.
- **Charging Station:** Keep the charging station free of dust and debris. Ensure no liquids come into contact with the ports.

Troubleshooting

Problem	Possible Cause	Solution
Bed frame is wobbly or noisy.	Loose fasteners. Uneven floor.	Ensure all bolts and screws are fully tightened. If on an uneven floor, place shims under bed legs.
Charging station not working.	Power cord unplugged. Outlet issue. Device compatibility.	Check if the bed frame's power cord is securely plugged into a working wall outlet. Test the outlet with another device. Ensure your device is compatible with the charging station's output.
Storage drawers do not slide smoothly.	Obstruction under the bed. Damaged wheels.	Check for any objects obstructing the drawer path. Inspect wheels for damage or debris.
Mattress slides on the frame.	Incorrect mattress size. Lack of anti-slip measures.	Ensure your mattress is the correct King size (80"x76"). The frame has an embedded design to help prevent sliding; ensure it's properly installed. Consider using a non-slip mattress pad.
