CARE AND MAINTENANCE

Proper care will ensure the longevity and appearance of your Vanity Art cabinet.

- **Cleaning Surfaces:** Wipe down the engineered wood surfaces regularly with a soft, damp cloth. For tougher spots, use a mild, non-abrasive cleaner specifically designed for wood or laminate surfaces. Avoid harsh chemicals, abrasive pads, or excessive moisture.
- **Spill Management:** Immediately wipe up any spills to prevent water damage or staining, especially on the edges and seams.
- **Hinge Maintenance:** Periodically check the soft-close hinges for any loose screws and tighten them if necessary. If the soft-close mechanism becomes less effective, consult the hinge manufacturer's guidelines for adjustment.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fading or discoloration.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Doors Not Closing Properly:** Check if the cabinet is level. If not, adjust the feet or shims underneath. Inspect the hinges for any loose screws and tighten them. The soft-close hinges may also require minor adjustment; refer to the hinge manufacturer's instructions for specific adjustment points.
- **Surface Stains:** For most stains on engineered wood, a damp cloth with a small amount of mild soap should suffice. Avoid abrasive cleaners or scrubbing vigorously, as this can damage the finish.
- **Loose Hardware:** Periodically check all screws and fasteners, especially those for hinges and cabinet connections. Tighten any that have become loose over time to maintain structural integrity.
