TROUBLESHOOTING

If you encounter any issues with your coffee bar station, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit is wobbly or unstable.	Screws are loose; uneven floor; anti-tip kit not installed.	Ensure all assembly screws are fully tightened. Adjust the leveling feet at the bottom of the unit. Install the anti-tip kit securely to a wall.
Coffee pod drawer slides out too easily.	Lack of a built-in stopper mechanism.	Exercise caution when pulling out the drawer to prevent it from sliding completely out. Consider adding a small, soft bumper or stopper to the drawer's track if desired (not included).
Missing parts during assembly.	Packaging error or lost during unpacking.	Double-check all packaging materials. If parts are still missing, contact YATINEY customer support with your purchase details.
