UKLISS 6-in-1 Air Styler & Blow Dryer Brush

UKLISS 6-in-1 Air Styler & Blow Dryer Brush

Model: 6-in-1 Air Styler & Blow Dryer Brush

1. INTRODUCTION

Thank you for choosing the UKLISS 6-in-1 Air Styler & Blow Dryer Brush. This versatile styling tool is designed to provide multiple hair styling options with ease and efficiency. Please read this manual thoroughly before use to ensure safe operation and optimal performance.

2. IMPORTANT SAFETY INFORMATION

- Always wear heat-resistant gloves when changing attachments to prevent burns.
- Allow the brush and attachments to cool completely before cleaning or storing.
- Avoid direct contact with the bristle area as it can become hot during use.
- Do not use the appliance in wet conditions or immerse it in water or other liquids.
- The product is equipped with an ALCI (Appliance Leakage Current Interrupter) safety plug for enhanced protection. If the ALCI trips, reset it before further use.
- Keep out of reach of children.
- Unplug the appliance when not in use.

3. PACKAGE CONTENTS

Your UKLISS 6-in-1 Air Styler & Blow Dryer Brush set includes the following components:

- Main Styler Handle
- Hair Dryer Head
- Straightening Brush
- 2 x 30.5mm Auto-Wrap Air Curlers (for left and right styling)
- Volumizing Blow Dryer Brush
- Daily Hot Round Brush

- Heat-Resistant Glove
- Comb

4. PRODUCT OVERVIEW & FEATURES

The UKLISS Air Styler features a main handle with a control switch and various detachable heads for different styling needs. It incorporates ionic technology to reduce frizz and enhance shine.

Blow Dryer Hair Smoothing Brush

Apply oil to wet hair and use a detangling brush to keep hair smooth and silky all day long.

It gives you smooth hair, but it cannot directly achieve the effect of straightening curly hair.

Figure 4.1: Main components and features of the UKLISS Air Styler.

Ionic Technology

This styler utilizes negative ion technology to neutralize static, reduce frizz, and leave hair shiny and smooth. This helps

protect hair scales and strengthen the hair core, minimizing heat damage.

Provides hair with natural shine

In depth scalp care and hair nourishment

Millions of negative ions neutralize the charge to smooth hair and help to reduce drying time and minimize heat damage to the hair.

- ✓ **Protect hair scales**
- ✓ **Strong hair core**
- ✓ **Reduce root damage**

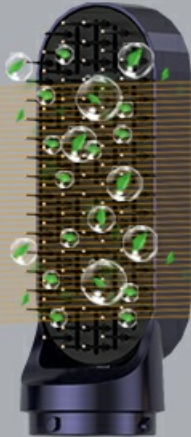

Figure 4.2: Benefits of negative ion technology for hair health and shine.

5. SETUP AND ATTACHMENT INSTALLATION

To install an attachment:

1. Press and hold the lock button on the main handle and push it downward to unlock.
2. Align the buckle of the desired accessory with the main handle, insert it, and rotate the accessory clockwise until it clicks into place.
3. After installing, push the lock key in the locking direction (upward) to secure the accessory.

To remove an attachment: Ensure the styler is cool. Press and hold the lock button, push it downward to unlock, and then pull the accessory off. Always wear heat-insulating gloves if the accessory is still warm.

Figure 5.1: Guide for installing and removing attachments.

6. OPERATING INSTRUCTIONS

Temperature Settings

The styler offers three adjustable heat settings, suitable for various hair types:

- **Low Setting (50°C/122°F):** Ideal for fine and damaged hair.
- **Mid Setting (80°C/176°F):** Recommended for long-lasting styles.
- **High Setting (110°C/230°F):** Best for coarse, pre-dried hair.

The device operates with 1 constant wind speed across all temperature settings.

3 Temp Constant Temp Hair Dryer

1 wind speed, no speed change, no hair tangling troubles

122–221°F constant temperature drying, suitable for all hair types, no need to worry about damaging your hair

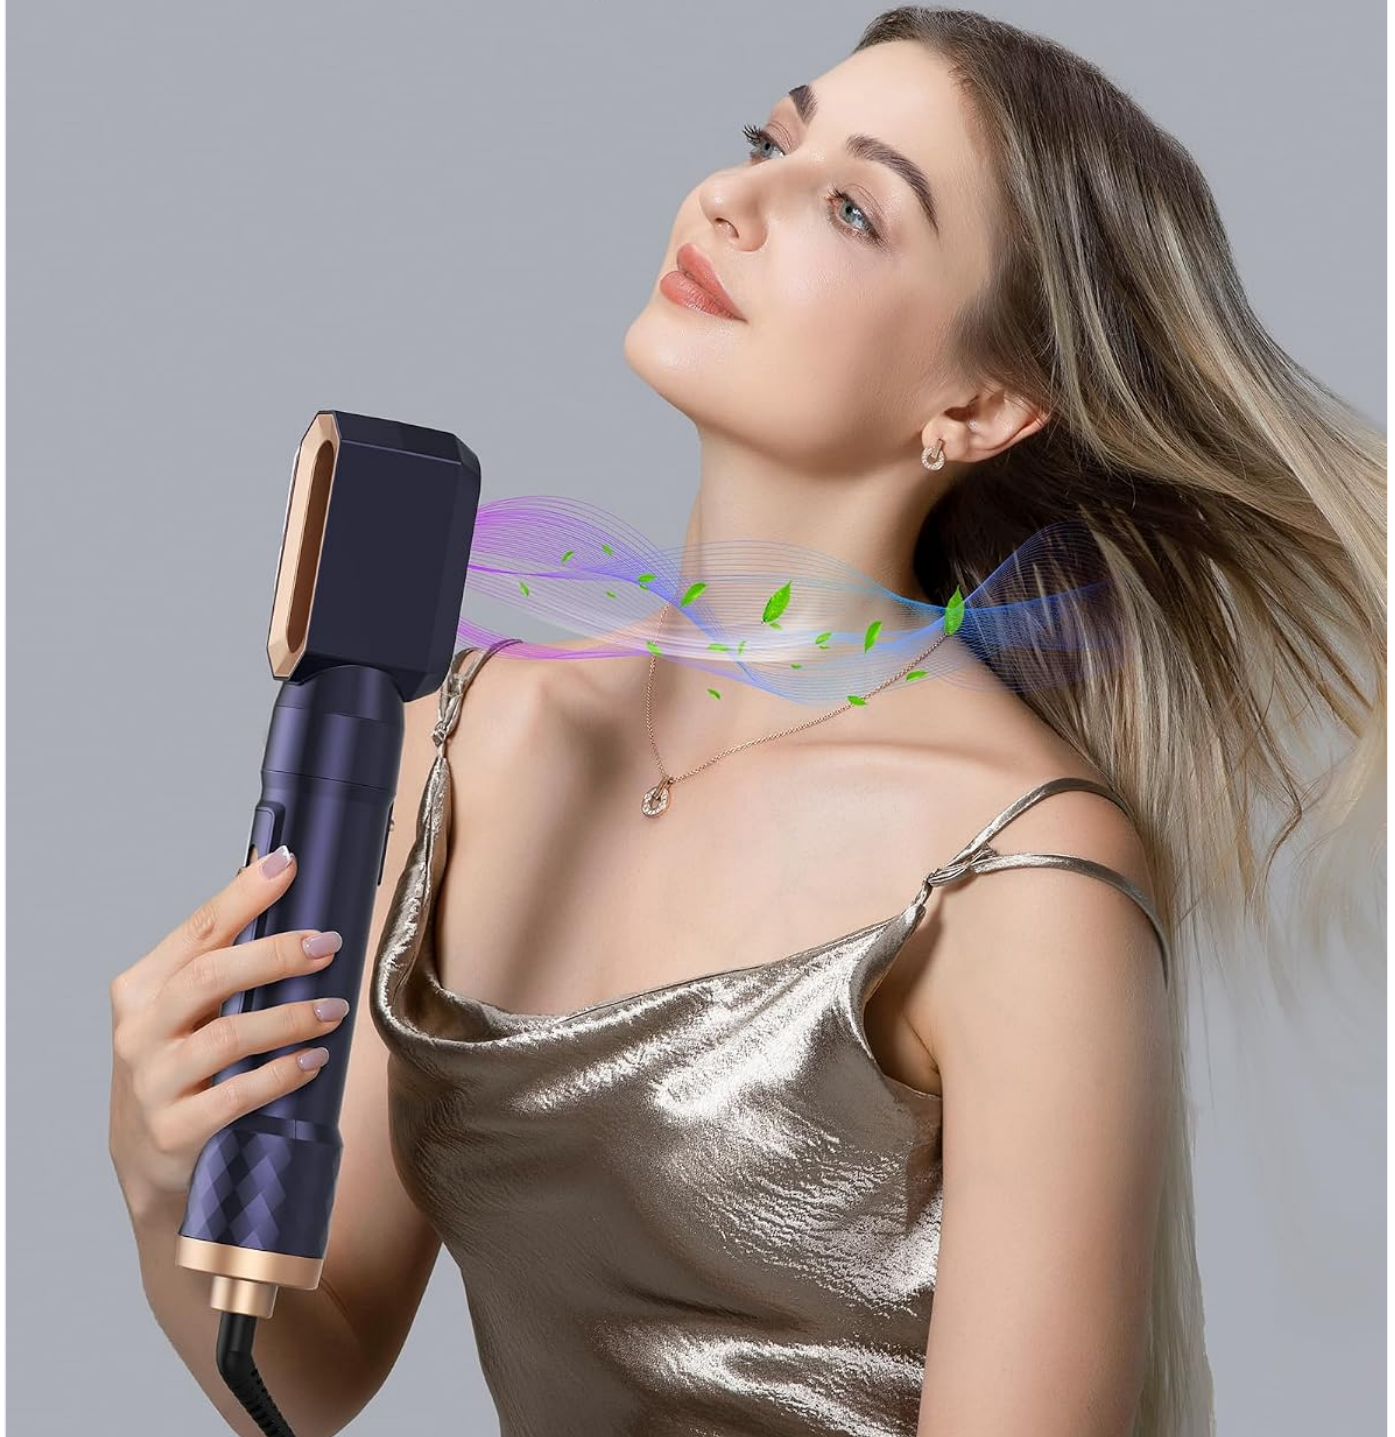

Figure 6.1: Temperature settings for the hair dryer function.

Using the Hair Dryer Head

Attach the hair dryer head to pre-dry your hair before styling with other attachments. Select the appropriate temperature setting for your hair type.

Using the Auto-Wrap Air Curlers

The 30.5mm auto-wrap air curlers use high-speed airflow to automatically wrap hair around the barrel, creating curls. Use on semi-wet hair for best results.

1. Take a small section of semi-wet hair.
2. Hold a bunch of hair close to the curling iron and wait for the air to absorb them automatically.
3. Hold in place for 10 seconds, then use cold air (1 Gear) for 3 seconds to set the style.
4. Turn off the styler and gently release the curl by pulling down.
5. Apply mousse or styling spray to prolong the hairstyle.

1.34" Left/Right Automatic Curl

Adopt air adsorption wrapping technology to **automatically adsorb hair** and create natural curls

Use on wet hair; style with hot air first, then cool air for better fixation

Figure 6.2: Auto-wrap air curler in action, showing left and right curl directions.

Using the Smoothing Hot Hair Brush

This brush is designed to create a smooth styling effect when your hair is wet. It helps reduce frizz and tangling, especially for naturally curly hair, but it does not achieve a pin-straight hair effect like a flat iron.

Figure 6.3: Smoothing Hot Hair Brush for frizz reduction.

Using the Volumizing Blow Dryer Brush & Daily Hot Round Brush

These brushes are used to add volume, create natural waves, and style bangs. Use on damp hair for best results, lifting hair at the roots for maximum volume.

7. MAINTENANCE

- Always ensure the styler and attachments are unplugged and completely cool before cleaning.
- Wipe the main unit and attachments with a slightly damp cloth. Do not use abrasive cleaners or immerse any part in water.
- Regularly remove any hair or debris from the brushes and air inlet to maintain optimal performance.
- Store the styler and its attachments in a dry, safe place away from moisture and direct sunlight.

8. TROUBLESHOOTING

If you encounter issues with curling, refer to the following guidelines:

Your browser does not support the video tag.

Video 8.1: Demonstrates correct and incorrect techniques for using the auto-wrap air curler to achieve desired curls.

Figure 8.1: Correct vs. Incorrect Curling Techniques.

Common Curling Issues and Solutions:

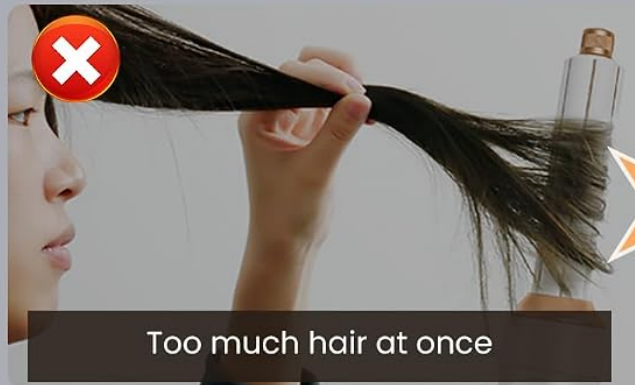

- **Hair not wrapping:** Ensure you are holding a small section of hair (approx. 10cm/3.93 inches from the tips) and bringing it towards the styler.
- **Curls not holding:** Ensure you hold the hair in place for 15 seconds or until dry, then use the cold air setting to set the curl before releasing.

- **Hair tangling:** Avoid holding too much hair at once. Do not rotate the handle directly; allow the air to wrap the hair automatically.
- **No power:** Check if the ALCI plug has tripped. Reset if necessary. Ensure the power cord is securely plugged into an outlet.

9. SPECIFICATIONS

Feature	Specification
Product Dimensions	12 x 12 x 3 inches; 2.27 Pounds
Wattage	800W
Power Source	Corded Electric
Special Features	ALCI Safety Plug
Hair Type Compatibility	All Hair Types
