SETUP AND INSTALLATION

Proper installation is crucial for optimal performance and safety. Follow these steps carefully.

1. Mirror Dash Cam Installation

1. Before installation, test all components to ensure they are functioning correctly.
2. Remove the screen and lens protectors from the mirror dash cam.
3. Install the mirror dash cam onto your vehicle's rearview mirror using the provided straps. Ensure it is securely fastened.

2. Inside Camera Installation

1. Choose a suitable spot on the front windshield for the inside camera.
2. Apply the electrostatic sticker to the chosen spot.
3. Insert the inside camera cable into the mirror dash cam.
4. Remove the red protective film from the adhesive on the inside camera.
5. Fix the inside camera in the selected position, then press and adjust it to your preferred angle.

3. Rear Camera Installation

1. Remove the license plate light.
2. Tear off the 3M adhesive on the rear camera and fix the rear camera next to the license plate light.

3. Connect the red wire of the rear camera cable with the positive cable of the car reverse light and fix it with insulating tape.

4. GPS Antenna Installation

1. Peel off the 3M adhesive from the GPS antenna.
2. Secure the GPS antenna to the dashboard near the front windshield, with the black side facing up.

5. Cable Management

1. Reserve a section of wire for the car charger and use a crowbar to hide the remaining wire along the gap of the front windshield.
2. Route the cable through the A-pillar and down the door gap.
3. Hide excess thread under the mat.
4. Connect the car charger to the car cigarette lighter port.
5. For the rear camera cable, hide the power cord along the gap between the car body and the ceiling on the side of the passenger seat, and between the rear seat and the ceiling.
6. Thread the rear camera cable to the trunk.

For detailed installation instructions, please refer to the official installation videos:

Video 2: WOLFBOX G900 Tripro cabin mirror dash cam installation video. This video guides you through the physical installation of the dash cam components.

Video 3: USB C Hardwire Kit Installation Video. This video provides instructions for hardwiring the dash cam for continuous power and parking monitor features.

OPERATING INSTRUCTIONS

The WOLFBOX G900 Tripro is designed for intuitive operation. Here are key features and how to use them.

1. Power On/Off

The dash cam will automatically power on when your vehicle's engine starts and power off when the engine is turned off, ensuring continuous recording without manual intervention.

2. 12-inch Touch Screen Display

The large, responsive touch screen allows for easy navigation between settings and camera views. Swipe left or right to switch between front, rear, and cabin camera views. Swipe up or down to adjust screen brightness.

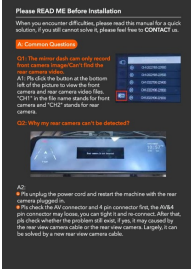

Figure 3: Smart Voice Control features for hands-free operation.

3. 5.8GHz WiFi & Voice Control

The dash cam features 5.8GHz WiFi for faster and more stable connections to your smartphone. Use the WOLFBOS app to view live footage, replay recordings, and share videos. Experience hands-free operation with voice control commands such as:
