Setup

Follow these steps to set up your portable air conditioner:

1. **Prepare Ice Packs:** Fill the provided ice boxes with water and freeze them for at least 6 hours.
2. **Access Water Tank:** Locate the water tank at the bottom rear of the unit. Turn the safety lock to the 'open' position and gently slide out the tank.
3. **Add Water and Ice Packs:** Place the frozen ice boxes into the water tank. Fill the tank with clean water, ensuring the water level is between the minimum and maximum indicators. (Tip: Do not add water from the top to avoid leaking.)
4. **Secure Tank:** Slide the water tank back into the unit and turn the safety lock to the 'closed' position.
5. **Power Connection:** Connect the power cord to the unit and then plug it into a standard 110V electrical outlet.

Operating Instructions

Your Z ZONAMA Portable Air Conditioner can be operated using the touch control panel on top of the unit or the provided remote control. Both offer the same functionality.

Control Panel & Remote Functions:

- **On/Off Button:** Press to power the unit on or off.
- **Speed Button:** Cycles through 6 fan speeds (F1 to F6). The current speed is displayed on the LED screen.
- **Mode Button:** Toggles between Normal mode and Sleeping mode.
- **Timer Button:** Sets the auto-off timer. You can set it for up to 12 hours.
- **Swing Button:** Activates the 60° automatic oscillation feature, distributing air across a wider area.
- **Cool Button:** Engages the evaporative cooling function. Ensure the water tank has sufficient water and ice packs for optimal cooling.
- **Lock Button:** Activates the child lock feature, preventing accidental changes to settings. The lock icon will appear on the display when active.

Maintenance

Regular maintenance ensures optimal performance and longevity of your air cooler.

- **Filter Cleaning:** The honeycomb filter is located at the back of the unit. It can be easily accessed by opening the rear panel. Clean or replace the filter regularly depending on usage to maintain air quality and efficiency.

- **Water Tank & Cooling Pads:** The water tank and cooling pads are detachable for easy cleaning. This prevents dust buildup and ensures hygienic operation.

Troubleshooting

If you encounter any issues with your Z ZONAMA Portable Air Conditioner, please refer to the following common solutions:

- **Unit Not Turning On:** Ensure the power cord is securely plugged into both the unit and a working electrical outlet. Check if the safety lock on the water tank is in the 'closed' position.
- **No Cooling Effect:** Verify that the water tank has sufficient water and that the ice packs are frozen and placed inside. Ensure the 'Cool' function is activated. In very humid environments, evaporative coolers may be less effective.
- **Weak Airflow:** Check if the air filter is clean and free from obstructions. Ensure the fan speed is set to a higher level.
- **Unusual Noise:** Check for any foreign objects inside the unit or obstructions around the fan blades. Ensure the unit is placed on a stable, flat surface.
