## OPERATING INSTRUCTIONS

The goal is to guide the small metal ball from the starting point through the entire numbered track to the end, where Grogu is located. The maze contains 80 obstacles.

1. **Starting the Maze:** Locate the starting point, typically marked with a "1". Position the sphere so the metal ball rests at this point.
2. **Navigating Obstacles:** Gently flip, twist, and spin the sphere 360 degrees to maneuver the ball along the numbered track. The maze includes various challenges such as an anti-gravity path, IG-12 Ride, Kalevala Chase, Forge Controller, Living Waters, and Hyper Loop.
3. **Avoiding Falls:** Exercise precision and control to prevent the ball from falling off the track. If the ball falls, return it to the starting point or the last successfully completed numbered checkpoint and

try again.

4. **Reaching the End:** Continue guiding the ball through all 80 obstacles until it reaches the final destination.
5. **Releasing Grogu:** Once the ball successfully completes the maze, twist the knob located on the sphere to open the central orb and release the Grogu miniature.

## MAINTENANCE

- **Cleaning:** To clean the Perplexus sphere, wipe the exterior with a soft, dry, or slightly damp cloth. Do not use harsh chemicals or abrasive cleaners, as these may damage the plastic.
- **Storage:** Store the Perplexus sphere in a cool, dry place away from direct sunlight to prevent

material degradation. Keep it on its display stand to prevent rolling and potential damage.

- **Handling:** Handle the sphere with care to avoid dropping it, which could cause internal or external damage.

## TROUBLESHOOTING

---

- **Ball Stuck:** If the metal ball becomes stuck in an inaccessible part of the maze, gently shake and rotate the sphere to dislodge it. Avoid forceful impacts.
- **Difficulty Navigating:** The Perplexus maze is designed to be challenging. If you find it too difficult, try practicing specific sections or observing the path carefully before attempting to move the ball. Patience and precise movements are key.
- **Grogu Release Mechanism:** If Grogu does not release after completing the maze, ensure the ball has reached the absolute end point and the knob is twisted fully.
