- Bed Frame Components (Headboard, Side Rails, Slats)
- Storage Drawers (2 units)
- Built-in Charging Station
- Assembly Hardware (Screws, Allen Wrenches, Screwdriver)

SETUP AND ASSEMBLY

Assembly typically takes approximately 1.5 to 3.5 hours for one person. All necessary tools are provided.

1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided diagrams and labels.
2. **Assemble the Main Bed Frame:** Follow the step-by-step instructions in the manual to connect the headboard, side rails, and footboard. Ensure all connections are secure but do not fully tighten screws until the frame is completely assembled.
3. **Install Bed Slats:** Attach the metal bed slats to the frame. The buckle design ensures stability and simplifies installation.
4. **Assemble Storage Drawers:** The two large storage drawers are designed for easy assembly. Attach the wheels to the bottom of the drawer frames, ensuring they are correctly aligned for smooth rolling.
5. **Integrate Drawers with Bed Frame:** The drawers hook to the bed frame using adjustable screws at the top, allowing them to be securely fixed and preventing unwanted movement.
6. **Install Headboard Shelf and Charging Station:** Secure the headboard shelf and integrate the built-in charging station. Ensure the power cord is routed safely and connected to a wall outlet.
7. **Final Tightening:** Once all components are in place and aligned, fully tighten all screws and fasteners.
8. **Mattress Placement:** For optimal fit and to prevent mattress sliding, a **10-inch thick twin-size mattress** is recommended. An 8-inch mattress may leave a gap.

Easy to install

Anti-movement Drawers Design:

Do not tighten the screws too much during installation. Leave enough length to hang the drawer in the reserved hole on the bed frame to keep the drawer fixed.

MAINTENANCE

- **Cleaning:** Wipe metal and wood surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners. For upholstered parts, spot clean with a mild detergent and allow to air dry.
- **Regular Inspection:** Periodically check all bolts, screws, and connections to ensure they remain tight. Re-tighten as needed to maintain stability and safety.
- **Drawer Care:** Keep the drawer wheels free of debris to ensure smooth operation.

TROUBLESHOOTING

- **Uneven Drawers:** If drawers appear uneven, check the floor surface for levelness. Also, ensure the adjustable screws that hook the drawers to the bed frame are properly set and tightened.

- **Mattress Sliding:** If your mattress slides, consider using a mattress with a thickness of 10 inches to fill the bed frame more completely. A non-slip mattress pad can also help.
- **Missing Parts:** If any parts are missing or damaged upon arrival, please contact IRONCK customer service for assistance.
- **Squeaking Noises:** Check all frame connections and tighten any loose screws. Ensure the bed slats are properly seated.
