6. TROUBLESHOOTING

If you encounter issues with your desk, refer to the following common solutions:

Problem	Possible Cause	Solution
Parts do not fit together during assembly.	Incorrect orientation of parts or missing steps.	Review the assembly instructions carefully, ensuring each part is oriented correctly before fastening. Do not force parts.

Power hub is not providing power.	Power cord not fully plugged in or wall outlet issue.	Check that the power hub's cord is securely plugged into a functioning wall outlet. Test the wall outlet with another device.
Drawers do not slide smoothly.	Drawer slides misaligned or debris in tracks.	Ensure drawer slides are installed correctly and aligned. Check tracks for any obstructions and clean if necessary.
