Product Overview

The AZDOME M17 Pro is a high-performance dual dash cam system designed to capture clear footage of your journeys. It features a front camera capable of 4K resolution and a rear camera with 1080P resolution, ensuring comprehensive coverage.

Figure 2: AZDOME M17 Pro Dash Cam and App Interface.

The system provides dual-channel recording, capturing both the road ahead and behind your vehicle simultaneously. The front camera records in stunning 4K UHD, while the rear camera records in 1080P Full HD, providing critical details for accident reconstruction or scenic drives.

Figure 3: 4K+1080P Dual Channel Recording.

Setup

1. Mounting the Dash Cam

1. Clean the windshield area where the dash cam will be mounted.
2. Attach the electrostatic sticker to the windshield, then mount the dash cam onto the sticker.

3. Adjust the lens angle to ensure a clear view of the road.

2. Connecting Power

- Connect the Type-C charging cable to the dash cam.
- Plug the other end of the cable into the provided Dual USB Car Charger.
- Insert the car charger into your vehicle's cigarette lighter socket.

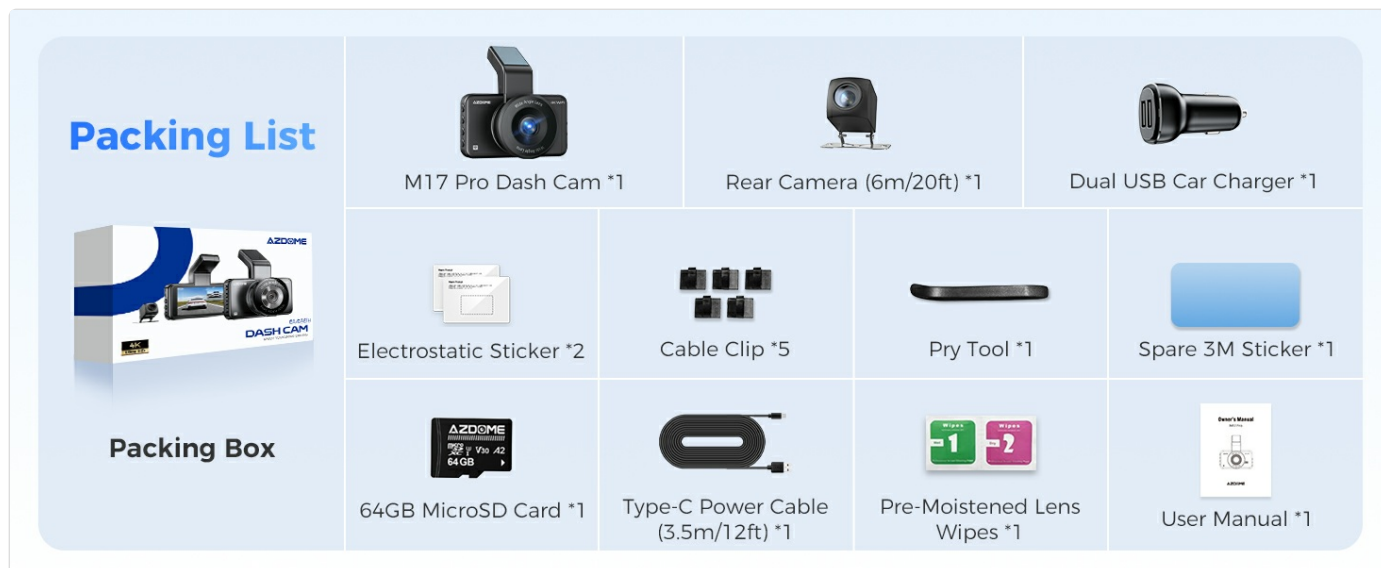

Figure 4: Dual USB Car Charger Connection.

3. Rear Camera Installation

- Mount the rear camera on the rear windshield using the adhesive.
- Route the rear camera cable to the main dash cam unit.
- For parking assistance, connect the red reverse line of the rear camera to the positive pole of your vehicle's reverse light.

Figure 5: Parking Assistance Function Display.

4. App WiFi Connection Guide

The AZDOME app allows for seamless video playback, downloads, and sharing. Ensure your dash cam is powered on and within 10 feet of your smartphone for optimal connection.

ADAS (Advanced Driver Assistance Systems)

Real-time monitoring of your vehicle's surroundings via cameras and sensors, enhancing driving safety and convenience by helping you navigate complex road conditions with confidence.

NOTE: When ADAS is enabled, resolution adjusts to 2K+1K.

Operating Instructions

1. Loop Recording and Emergency Lock

The dash cam automatically records in a continuous loop, overwriting the oldest footage when the memory card is full. The included 64GB card provides ample storage, and the system supports cards up to 128GB.

APP WiFi Connection Guide for M17 Pro

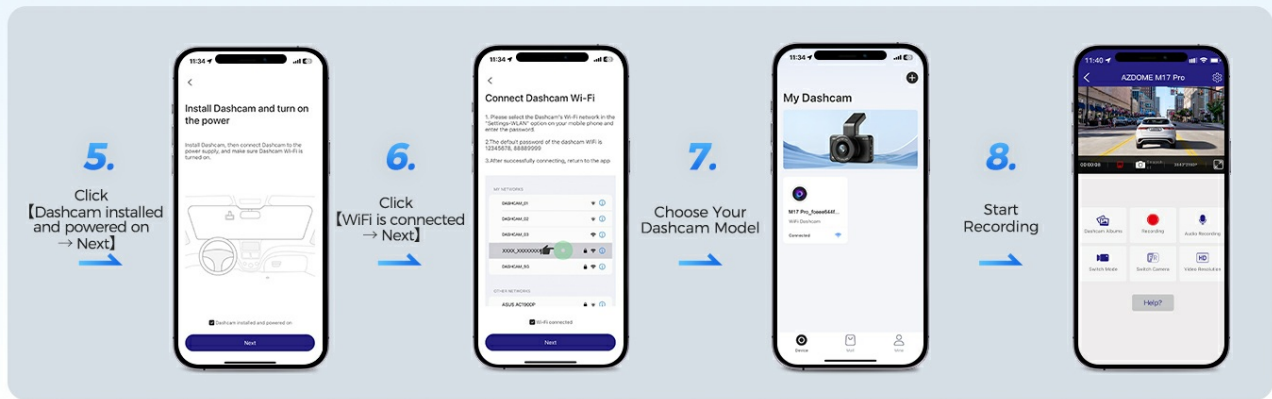

Figure 8: Loop Recording with Free 64GB Card.

The built-in G-Sensor detects sudden impacts or collisions. When an event is detected, the current footage is automatically locked and saved to prevent it from being overwritten, ensuring critical evidence is preserved.

Figure 9: G-Sensor and Loop Recording.

2. Voice Control

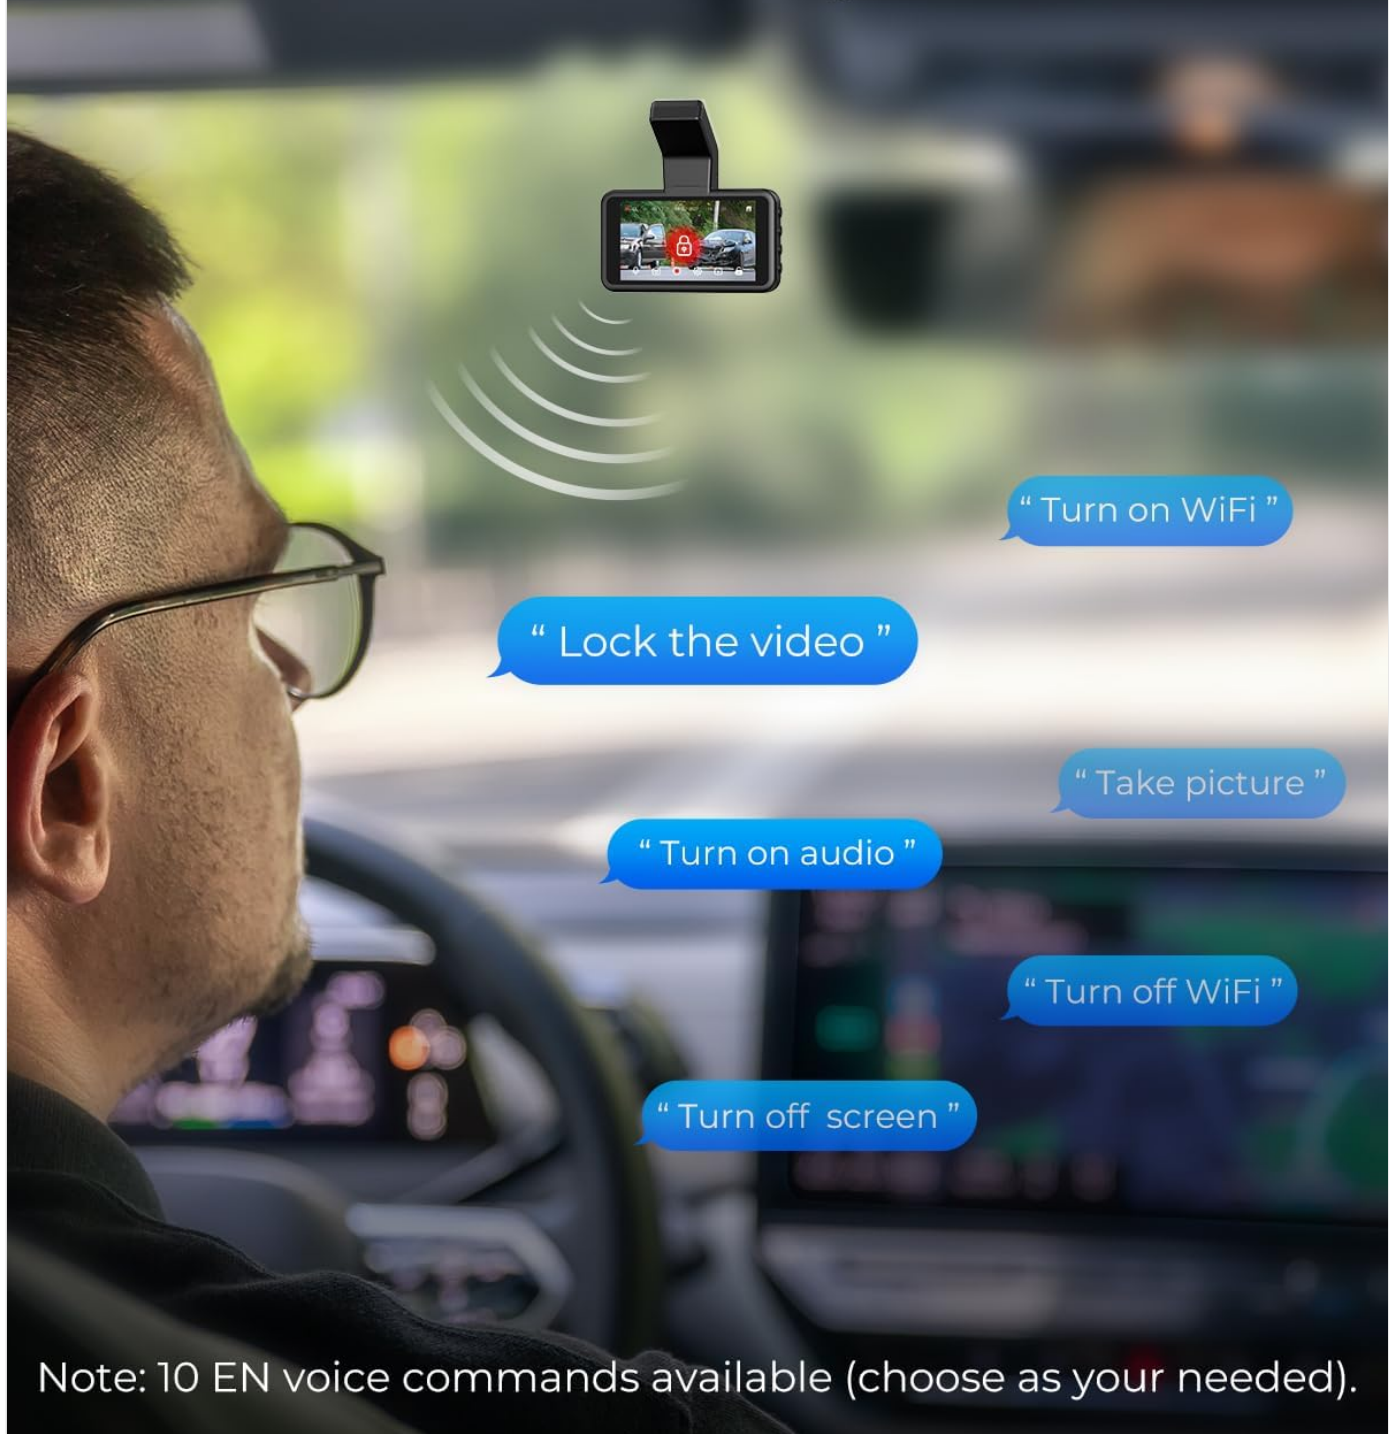

The M17 Pro supports voice commands for hands-free operation. This allows you to control key functions without taking your hands off the steering wheel, enhancing safety.

- "Lock the video"
- "Turn on WiFi"

- "Take picture"
- "Turn on audio"
- "Turn off WiFi"
- "Turn off screen"
- And other commands as listed in the device settings.

Smart Voice Control

Easily control your dashcam without taking your hands off the steering wheel.

Note: 10 EN voice commands available (choose as your needed).

Advanced Features

1. ADAS (Advanced Driver Assistance Systems)

The ADAS feature provides real-time alerts to enhance driving safety. This includes Lane Departure Warning (LDW), which alerts you if your vehicle drifts out of its lane without signaling. Note: When ADAS is enabled, resolution adjusts to 2K+1K.

2. Fatigue Driving Alert

To promote safe driving habits, the dash cam can remind you to take a rest after 1, 2, or 4 hours of continuous driving. This feature helps prevent accidents caused by driver fatigue.

Loop Recording with Free 64GB Card

Automatically overwrites the oldest footage with the newest when the memory card reaches full capacity, supporting cards up to 128GB.

3. 24H Parking Modes

For continuous monitoring when your vehicle is parked, the M17 Pro offers two parking modes. A Type-C USB Port Hardwire Kit (ASIN: B0BM9JL327, not included) is required for these functions.

- **Collision Detection:** The built-in G-sensor detects impacts and automatically locks the video to prevent overwriting, securing evidence of any incidents.
- **Time-Lapse:** This mode enables continuous recording for 24 hours, capturing every detail around your parked vehicle efficiently.

24H Parking Modes

Need to connect the Type-C hardwire kit (not included).

Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the dash cam body. For the lens, use the provided pre-moistened lens wipes or a specialized lens cleaning solution and cloth to avoid scratches.
- **Storage:** When not in use for extended periods, store the dash cam in a cool, dry place away from direct sunlight and extreme temperatures.

- **Memory Card:** Periodically format the MicroSD card (at least once a month) to ensure optimal performance and prevent data corruption. Back up any important footage before formatting.
- **Firmware Updates:** Check the AZDOME official website or app for any available firmware updates to ensure your dash cam has the latest features and bug fixes.

Troubleshooting

Problem	Possible Cause / Solution
Dash cam does not power on.	Check power connection to the car charger and vehicle's power outlet. Ensure the vehicle's ignition is on.
Recording stops or freezes.	MicroSD card may be full or corrupted. Format the card. Use a high-speed (Class 10 or U3) MicroSD card.
Poor video quality.	Clean the camera lens and windshield. Ensure the protective film is removed from the lens. Check resolution settings.
Wi-Fi connection issues.	Ensure the dash cam's Wi-Fi is enabled. Keep your smartphone within 10 feet of the dash cam. Restart both devices.
Parking mode not working.	A hardwire kit (ASIN: B0BM9JL327) is required for 24H parking modes. Ensure it is correctly installed and connected.

Specifications

Feature	Detail
