6. OPERATING INSTRUCTIONS

6.1 Wireless CarPlay Connection

To connect your iPhone wirelessly to CarPlay:

1. Open the CarPlay application on the car stereo.
2. On your iPhone, go to Settings > Bluetooth and connect to the device named 'BLINK_6115' (or similar).
3. Confirm the pairing request on both devices.
4. Once connected, CarPlay will launch automatically on the car stereo display.

Video: Demonstrates the steps for connecting a smartphone to the car stereo via Wireless CarPlay, including opening the CarPlay app, connecting via Bluetooth, and confirming the connection.

6.2 Wireless Android Auto Connection

To connect your Android phone wirelessly to Android Auto:

1. Open the Android Auto application on the car stereo.
2. On your Android phone, go to Settings > Bluetooth and connect to the device named 'BLINK_6115' (or similar).
3. Confirm the pairing request on both devices.
4. Once connected, Android Auto will launch automatically on the car stereo display.

Video: Illustrates the process of connecting an Android smartphone to the car stereo using Wireless Android Auto, including opening the Android Auto app, establishing a Bluetooth connection, and confirming the pairing.

6.3 Wireless iPhone Mirroring

To mirror your iPhone screen wirelessly:

1. Open the 'Mirroring' application on the car stereo and select 'iPhone'.
2. On your iPhone, go to Settings > Personal Hotspot and enable it. Ensure 'Allow Others to Join' is active.
3. On the car stereo, connect to your iPhone's personal hotspot via Wi-Fi.
4. On your iPhone, open Control Center, select 'Screen Mirroring', and then choose 'zj-airplay'.
5. Your iPhone screen will now be mirrored on the car stereo display.

Video: Shows how to set up wireless iPhone mirroring, including enabling personal hotspot, connecting the car stereo to the hotspot, and initiating screen mirroring from the iPhone's Control Center.

6.4 Wireless Android Mirroring

To mirror your Android phone screen wirelessly:

1. Open the 'Mirroring' application on the car stereo and select 'Android'.
2. For the first connection, scan the QR code displayed on the car stereo screen with your phone's browser to download the mirror software (zPlus app).
3. Connect your Android phone to the car stereo via Bluetooth.
4. On your Android phone, enable Personal Hotspot.
5. Open the zPlus app on your phone and click the 'Start Mirroring' button to begin screen projection.

Video: Guides through the steps for wireless Android mirroring, including downloading the necessary app, connecting via Bluetooth, enabling personal hotspot, and starting screen projection from the zPlus app.

6.5 Basic Operations

- **Volume Control:** Adjust the volume using the on-screen controls or steering wheel controls (if configured).
- **Radio:** Access FM/RDS radio stations.
- **GPS Navigation:** Utilize built-in offline maps or online navigation via connected smartphone.
- **Split Screen:** Use two applications simultaneously on the screen.

- **UI Customization:** Personalize the home screen layout and window designs.
- **3D Car Model Display:** Experience dynamic 3D car model effects.
- **DSP Audio:** Adjust sound settings for optimal audio output.

7. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the touchscreen and exterior. Avoid abrasive cleaners or solvents.
- **Software Updates:** Periodically check for software updates to ensure optimal performance and access to new features. Follow the on-screen instructions for any available updates.
- **Environmental Conditions:** Avoid exposing the unit to extreme temperatures or direct sunlight for prolonged periods.

8. TROUBLESHOOTING

- **No Power:** Check all power connections and the vehicle's fuse box. Ensure the ignition is on.
- **No Sound:** Verify speaker connections, volume levels, and audio source selection. Check DSP settings.
- **Touchscreen Unresponsive:** Try restarting the unit. If the issue persists, perform a factory reset (refer to the Car Settings menu).
- **Bluetooth/CarPlay/Android Auto Connection Issues:** Ensure Bluetooth is enabled on both the stereo and your phone. Forget the device on both ends and attempt to re-pair. Check for any interference.
- **GPS Signal Loss:** Ensure the GPS antenna is properly installed and has a clear view of the sky.
- **Backup Camera Not Displaying:** Check the camera's power and video connections. Ensure the vehicle is in reverse gear.
