Infanti Luke 360 Lifestyle

Infanti Luke 360° Lifestyle Car Seat

INSTRUCTION MANUAL

1. Introduction

This manual provides essential information for the correct installation, operation, and maintenance of your Infanti Luke 360° Lifestyle Car Seat. Please read all instructions carefully before use and keep this manual for future reference. Proper use ensures the safety and comfort of your child.

Image 1.1: Front view of the Infanti Luke 360° Lifestyle Car Seat.

2. Safety Information and Warnings

Always prioritize your child's safety. Failure to follow these instructions can result in serious injury or death.

- **Child Weight and Age Groups:** This car seat is suitable for children from Group 0+ (0-13 kg),

Group 1 (9-18 kg), Group 2 (15-25 kg), and Group 3 (22-36 kg). It accommodates newborns up to children weighing 36 kg.

- **Installation:** Always install the car seat securely using either the vehicle's ISOFIX system and Top Tether, or the vehicle's 3-point seat belt as specified for the child's weight group.
- **Harness System:** Ensure the 5-point harness is correctly adjusted and snug against your child's body, with no slack. The chest clip should be at armpit level.
- **Rear-Facing Position:** For maximum safety, children should remain in the rear-facing position for as long as possible, up to the maximum weight and height allowed by the car seat (typically up to 18 kg for this model).
- **Forward-Facing Position:** Only transition to forward-facing once your child meets the minimum weight and height requirements and has outgrown the rear-facing limits.
- **Vehicle Compatibility:** Verify that your vehicle is compatible with ISOFIX installation if you intend to use this method. Consult your vehicle's owner's manual.
- **Accident Replacement:** A car seat involved in a moderate to severe accident should be replaced immediately, even if there is no visible damage.

3. Components Overview

Familiarize yourself with the main parts of your Infanti Luke 360° Lifestyle Car Seat:

- **5-Point Harness System:** Secures the child within the seat.
- **Adjustable Headrest:** Provides head and neck support, adjustable for child's height.
- **Padded Body and Head Supports:** Removable inserts for comfort and proper fit for smaller infants.
- **ISOFIX Connectors:** Rigid connectors for direct attachment to vehicle's ISOFIX anchor points.
- **Top Tether Strap:** Additional anchor point for forward-facing ISOFIX installation.
- **Recline Adjustment Lever:** Allows selection of 4 recline positions.
- **360° Rotation Mechanism:** Base allows the seat to rotate for easy access and position changes.

4. Setup and Installation

Follow these steps for secure installation. Refer to your vehicle's manual for specific ISOFIX anchor locations.

4.1. ISOFIX Installation (Groups 0+, 1, 2, 3)

1. Locate the ISOFIX anchor points in your vehicle. These are usually found between the seat back and cushion.
2. Extend the ISOFIX connectors from the car seat base by pressing the release buttons (refer to Image 4.1).
3. Align the ISOFIX connectors with the vehicle's anchor points and push firmly until you hear a distinct 'click' and the indicators turn green.
4. Push the car seat firmly against the vehicle seat back to ensure a tight fit.
5. For forward-facing installation (Group 1, 2, 3), attach the Top Tether strap to the designated anchor point in your vehicle and tighten it until taut.

4.2. Rear-Facing Installation (Group 0+, 1)

For infants and toddlers, the rear-facing position offers superior protection.

1. Ensure the car seat is rotated to the rear-facing position.
2. Install using the ISOFIX system as described in Section 4.1.
3. Adjust the recline to the most reclined position suitable for a newborn (refer to Section 5.2).
4. For Group 0+ (newborns), use the padded body and head supports for proper positioning.

4.3. Forward-Facing Installation (Group 1, 2, 3)

For older toddlers and children.

1. Ensure the car seat is rotated to the forward-facing position.
2. Install using the ISOFIX system and Top Tether as described in Section 4.1.
3. Adjust the recline to an upright position suitable for the child's age and comfort.
4. For Group 2 and 3, the internal 5-point harness may be removed, and the child secured using the vehicle's 3-point seat belt, guided by the car seat's belt guides. Consult the specific instructions for harness removal.

5. Operating Instructions

5.1. 360° Rotation

The car seat features a 360° rotation function for ease of use.

1. To rotate the seat, ensure the child is not in the seat or is properly secured.
2. Locate the rotation release lever/button on the base of the car seat.
3. Press the lever/button and rotate the seat to the desired position (rear-facing, forward-facing, or side-facing for loading/unloading).
4. Ensure the seat locks securely into place before driving.

Image 5.1: The car seat demonstrating its 360° rotation capability.

5.2. Recline Adjustment

The car seat offers 4 recline positions for your child's comfort.

1. Locate the recline adjustment lever, typically found at the front or side of the seat base.
2. While holding the lever, adjust the seat to one of the 4 available recline positions.
3. Ensure the seat clicks firmly into the chosen position.

5.3. Harness Adjustment

The 5-point harness must be adjusted to fit your child snugly.

1. **Shoulder Strap Height:** For rear-facing, shoulder straps should be at or slightly below your child's shoulders. For forward-facing, they should be at or slightly above your child's shoulders. Adjust the headrest to simultaneously adjust the shoulder strap height.
2. **Tightening the Harness:** Pull the harness adjustment strap at the front of the seat until the straps are snug against your child's body. You should not be able to pinch any slack in the harness straps at the shoulder.
3. **Loosening the Harness:** Press the harness release button (usually located near the adjustment strap) and pull the shoulder straps forward.
4. **Chest Clip:** Position the chest clip at armpit level.

6. Maintenance

Regular cleaning and maintenance will prolong the life of your car seat.

- **Fabric Covers:** The fabric covers are removable for cleaning. Hand wash with mild soap and cold water, or machine wash on a delicate cycle with cold water. Do not use bleach. Air dry only; do not tumble dry.
- **Harness Straps:** Wipe harness straps with a damp cloth and mild soap. Do not immerse in water or machine wash, as this can weaken the webbing.
- **Plastic Parts:** Wipe plastic parts with a damp cloth and mild soap.
- **Buckle:** Clean the buckle by rinsing it under warm water. Do not use detergents or lubricants.
- **Inspection:** Periodically inspect the car seat for any signs of wear, damage, or loose parts. If any damage is found, discontinue use and contact customer support.

7. Troubleshooting

If you encounter issues with your car seat, refer to the following common solutions:

- **Car Seat Feels Loose After Installation:**
Solution: Re-check ISOFIX connectors for a secure 'click' and green indicators. Ensure the Top Tether (if used) is taut. Push the car seat firmly into the vehicle seat while tightening.
- **Harness Straps are Difficult to Tighten/Loosen:**
Solution: Ensure the harness release button is fully pressed when loosening. Check for any twists in the harness webbing under the seat. Ensure no fabric is obstructing the adjustment mechanism.
- **Seat Does Not Rotate Smoothly:**
Solution: Ensure the rotation release lever/button is fully engaged. Check for any obstructions under the seat or in the rotation mechanism. Ensure the car seat is not overloaded.
- **Child's Head Slumps Forward (Rear-Facing):**
Solution: Adjust the recline position to a more reclined angle. Ensure the padded body and head supports are correctly installed for smaller infants.

If the issue persists, contact Infanti customer support.

8. Specifications

Brand	Infanti
Model	Luke 360 Lifestyle
Color	Black
Child Weight Range	0 - 36 kg
Child Age Groups	Group 0+, 1, 2, 3
Installation Method	ISOFIX with Top Tether (or vehicle 3-point belt for later groups)
Recline Positions	4
