

BE-TEMPLIGHTS

Generic Construction String Lights (Model BE-TEMPLIGHTS) User Manual

1. INTRODUCTION

This manual provides instructions for the safe installation, operation, and maintenance of your Generic Construction String Lights. This 100-foot string light set features 10 sockets and is designed for temporary indoor and outdoor use. It offers end-to-end connection capability for extended coverage.

2. SAFETY INFORMATION

Read all safety instructions before installation and use. Failure to follow these instructions may result in fire, electric shock, or injury.

- **Electrical Safety:** Always ensure the power source is disconnected before installing, replacing bulbs, or performing maintenance. Do not overload the circuit. Use only with compatible voltage and wattage as specified.
- **Bulb Compatibility:** This product does not include bulbs. Use only LED or incandescent bulbs with an E26/E27 medium base. Do not exceed the maximum wattage rating per socket (refer to product labeling for specific limits).
- **Outdoor Use:** When used outdoors, connect to a Ground Fault Circuit Interrupter (GFCI) protected outlet. Ensure all connections are secure and protected from moisture.
- **Placement:** Do not install near flammable materials or surfaces. Ensure the string lights are securely mounted to prevent falling. Avoid placing the cord in high-traffic areas where it could be a tripping hazard, though the yellow cord enhances visibility.
- **Damage Inspection:** Regularly inspect the cord, sockets, and plugs for any damage. Do not use if the cord is frayed, cracked, or if any sockets are damaged.

3. PACKAGE CONTENTS

Verify that all components are present in the package:

- 1 x 100-foot String Light with 10 Sockets
- Light Sockets (integrated into the string light)

Note: Bulbs are not included and must be purchased separately.

4. SETUP

Follow these steps for proper installation:

1. **Unpack:** Carefully uncoil the string light from its packaging.
2. **Install Bulbs:** Ensure the string light is unplugged. Screw compatible E26/E27 medium base bulbs into each of the 10 sockets. Do not overtighten.
3. **Mounting:** Securely hang the string lights in your desired location. Use appropriate mounting hardware (not included) such as hooks, zip ties, or guide wires. Ensure the weight of the string and bulbs is adequately supported.
4. **Connecting Multiple Strings (Optional):** If extending coverage, connect the male plug of an additional string light into the female receptacle at the end of the first string. Ensure the total wattage of all connected strings does not exceed the maximum allowable limit (refer to product labeling).
5. **Power Connection:** Once all bulbs are installed and the string is securely mounted, plug the string light into a suitable power outlet. For outdoor use, a GFCI-protected outlet is recommended.

Image: The Generic Construction String Lights, a 100-foot yellow cord with 10 evenly spaced light sockets. The string is coiled, indicating its compact packaging. Bulbs are not included with this product.

5. OPERATION

These string lights are designed for temporary illumination in various settings, including construction sites, work areas, events, or other temporary applications.

- **Power On/Off:** To operate, simply plug the string light into a live power outlet. Unplug to turn off.
- **Intended Use:** The heavy-duty yellow cord construction is designed to withstand various weather conditions and regular use in temporary indoor and outdoor environments.

6. MAINTENANCE

Proper maintenance ensures longevity and safe operation of your string lights.

- **Cleaning:** Disconnect power before cleaning. Wipe the cord and sockets with a dry or slightly damp cloth. Do not immerse in water.
- **Bulb Replacement:** Always unplug the string light before replacing bulbs. Allow bulbs to cool completely before handling. Screw in new bulbs firmly but gently.
- **Storage:** When not in use, clean the string lights and coil them neatly. Store in a cool, dry place away from direct sunlight and extreme temperatures.
- **Regular Inspection:** Periodically check the entire string for any signs of wear, damage, or loose connections. Address any issues promptly.

7. TROUBLESHOOTING

If you encounter issues with your string lights, refer to the following common solutions:

- **Lights Not Turning On:**
 - Ensure the string light is securely plugged into a working power outlet.
 - Check if the outlet has power by plugging in another device.
 - Verify that all bulbs are correctly screwed in and are not burnt out. Replace any faulty bulbs.
 - If connected to a GFCI outlet, check if it has tripped. Reset if necessary.
- **Flickering Lights:**
 - Ensure all bulbs are tightly screwed into their sockets.
 - Check for loose connections at the plug or between connected strings.
 - Test individual bulbs to identify any that may be faulty.

8. SPECIFICATIONS
