SAFETY INFORMATION

Important Safety Notice: The FORZA Portable Team Shelter is designed for use in moderate weather conditions. **Do not use this product in extreme weather conditions**, including high winds, heavy rain, or snow, as this may lead to damage to the shelter or personal injury.

- Always ensure the shelter is properly anchored to the ground using the provided pegs.
- Regularly inspect all components for wear or damage before each use.
- Keep children and pets away from the shelter during assembly and disassembly.

PACKAGE CONTENTS

Your FORZA Portable Team Shelter (Electric Blue, Shelter Only) package should contain the following components:

- Steel Frame Components (various poles and connectors)
- Electric Blue Polyester Shelter Cover
- Anchor Pegs
- Carry Bag (for convenient transport and storage)

SETUP INSTRUCTIONS

Follow these steps to assemble your FORZA Portable Team Shelter:

1. **Unpack Components:** Carefully remove all frame components, the shelter cover, and anchor pegs from the packaging. Lay them out on a clean, flat surface.
2. **Assemble Frame Poles:** The steel frame consists of several interconnected poles. Connect the shock-corded poles by inserting the ends into the corresponding sleeves until the spring buttons snap into place. Ensure all connections are secure.

4. **Attach Shelter Cover:** Drape the Electric Blue polyester cover over the assembled steel frame. Align the cover so that the FORZA logos are correctly oriented. Secure the cover to the frame using the integrated touch fastening system (Velcro straps). Ensure the cover is taut and evenly distributed.

5. **Secure with Anchor Pegs:** Position the shelter in your desired location on a soft surface like grass. Use the provided anchor pegs to secure the shelter's base to the ground. Insert pegs through the designated loops or holes at the base of the frame and push them firmly into the ground.

OPERATING INSTRUCTIONS

The FORZA Portable Team Shelter is designed to provide protection from sun and light weather conditions for sports teams and individuals.

- **Sun Protection:** The shelter cover features a 50+ UPF rating, offering excellent protection against harmful UV rays. Position the shelter to maximize shade coverage as needed.
- **Weather Protection:** The coated polyester material provides resistance against light rain. However, as noted in the safety section, avoid use in extreme weather.
- **Portability:** The shelter is lightweight and designed for easy transport. When moving the shelter, ensure it is lifted and not dragged to prevent damage to the frame or cover.

MAINTENANCE

Proper maintenance will extend the lifespan of your team shelter.

- **Cleaning the Cover:** Clean the polyester cover with a damp cloth and mild soap. Do not use harsh chemicals or abrasive cleaners. Allow the cover to air dry completely before storage.
- **Frame Care:** The steel frame has a powder-coated finish for corrosion prevention. If the finish is scratched, touch up with rust-inhibiting paint to prevent rust. Wipe down the frame with a damp cloth as needed.
- **Storage:** When not in use, disassemble the shelter and store all components in a dry, cool place, preferably in its original carry bag, to protect it from environmental elements and prolong its life.
- **Inspection:** Periodically inspect all frame connections, fabric, and anchor points for signs of wear, tear, or damage. Replace any damaged parts immediately.

TROUBLESHOOTING

This section addresses common issues you might encounter with your FORZA Portable Team Shelter.

Problem	Possible Cause	Solution
Shelter feels unstable or wobbly.	Not properly anchored; frame connections loose.	Ensure all anchor pegs are fully inserted into the ground. Check all frame pole connections to ensure they are securely locked. Avoid using in windy conditions.
Cover does not fit correctly or is sagging.	Cover not aligned; Velcro straps not fully secured.	Re-align the cover on the frame. Ensure all touch fastening straps are firmly attached and tightened to create tension.
Difficulty connecting frame poles.	Debris in pole ends; spring button not engaging.	Check for any obstructions inside the pole ends. Ensure the spring button is fully depressed when inserting and snaps into place upon connection.
