AVENLI 3-5 Person Inflatable Hot Tub Spa User Manual

Model: 17654USV32DQ | Brand: AVENLI

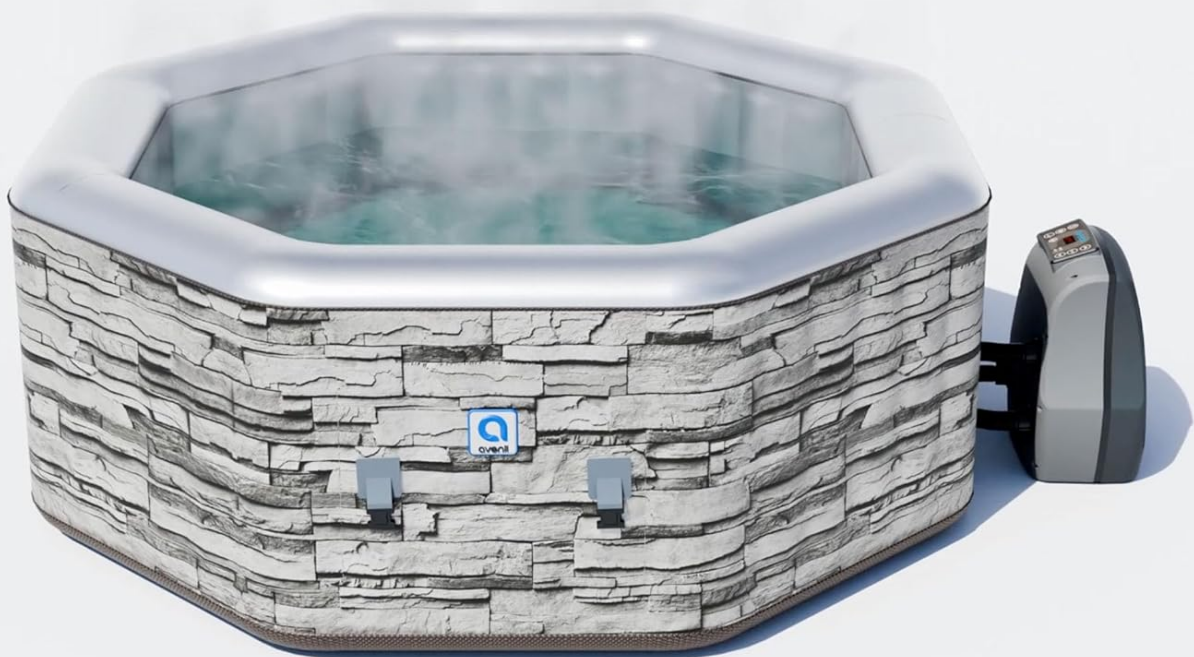

Image: The AVENLI 3-5 Person Inflatable Hot Tub Spa, an octagon-shaped hot tub with a stone-patterned exterior and an external pump unit.

INTRODUCTION

This manual provides essential information for the safe and efficient operation, setup, and maintenance of your AVENLI 3-5 Person Inflatable Hot Tub Spa. Please read all instructions carefully before installation and use to ensure proper function and longevity of your product.

The AVENLI Inflatable Hot Tub Spa offers a relaxing experience with its 120 air jets, heating capability up to 104°F, and a spacious 211-gallon capacity. Its octagon design is suitable for 3 to 5 individuals.

SAFETY GUIDELINES

Your safety is paramount. Adhere to all safety warnings and instructions to prevent injury or damage.

- Always supervise children in and around the hot tub.
- Do not operate the hot tub if the water temperature exceeds 104°F (40°C).
- Ensure the RCD/GFCI circuit breaker is tested before each use.
- Do not use electrical appliances near the hot tub.
- Always use the lockable cover when the hot tub is not in use to prevent accidental access and heat loss.

LOCKABLE COVER INCLUDED

Image: The AVENLI hot tub with its grey, octagon-shaped lockable cover securely fastened, demonstrating its safety feature.

SETUP AND INSTALLATION

Follow these steps for proper setup of your inflatable hot tub.

1. Unpacking and Site Selection

Carefully remove all components from the packaging. Select a flat, stable, and level surface capable of supporting the weight of the filled hot tub (approximately 211 gallons of water plus occupants). Ensure the location is near a suitable power outlet.

2. Component Check

Verify all parts are present as per the 'Complete Hardware Included' diagram.

COMPLETE HARDWARE INCLUDED

Inflating Hose

Caps

Pump Unit

GFCI Plug

Filter Cartridge Holder

Spa Liner

Repair Patch

Pump Unit Connectors

Airflow Valve

Base Protector

Filter Cartridge

Top Cover

Image: A layout of all included hardware components: inflating hose, caps, pump unit, GFCI plug, filter cartridge holder, spa liner, repair patch, pump unit connectors, airflow valve, base protector, filter cartridge, and top cover.

3. Inflation

Connect the inflating hose to the pump unit and the hot tub's inflation valve. Use the pump unit to inflate the hot tub until it is firm to the touch but not over-inflated. Do not use an air compressor.

4. Connecting the Pump Unit

Attach the pump unit to the hot tub's inlet and outlet connections using the provided connectors. Ensure all connections are secure and watertight.

5. Filling the Spa

Fill the hot tub with water using a garden hose. Fill to the indicated maximum fill line. Do not overfill.

EASY INSTALLATION

Image: A three-panel image showing the easy installation process: a person connecting the pump unit to the hot tub, a person carrying the pump unit, and a person filling the hot tub with water.

OPERATION

Familiarize yourself with the digital control panel for optimal use of your hot tub.

1. Digital Control Panel Overview

The control panel allows you to adjust temperature, activate the heating system, and control the air jets and filtration.

DIGITAL CONTROL PANEL

Features a Digital Control Panel for easy settings adjustment with just a touch of a button.

Image: A close-up of the AVENLI digital control panel, showing buttons for temperature adjustment, heating, air jets, filtration, and a lock function, with a digital display showing 40°C.

2. Heating the Water

Press the 'Heat' button on the control panel. Use the temperature adjustment buttons to set your desired water temperature, up to 104°F (40°C). The heating system will automatically turn off once the set temperature is reached.

3. Activating Air Jets

Press the 'Bubble' button to activate the 120 invigorating air jets. Press again to turn them off. The air jets provide a soothing massage experience.

MAINTENANCE

Regular maintenance ensures the longevity and hygiene of your hot tub.

1. Water Filtration

The hot tub features a filtration system with 150 filter pleats to keep the water clean. Regularly check and clean the filter cartridges. Replace them every few weeks, depending on usage, to maintain optimal filtration performance.

FILTRATION

Featuring 150 filter pleats capable of keeping dust, dirt, & other particles out.

Image: Two white filter cartridges with blue tops, designed for the hot tub's filtration system.

2. Cleaning the Spa

Periodically clean the interior and exterior of the hot tub with a mild detergent and soft cloth. Rinse thoroughly. Do not use abrasive cleaners.

3. Draining and Storage

When not in use for extended periods, or for seasonal storage, drain the hot tub completely. Use the easy drain valve for efficient water removal. Ensure the hot tub is thoroughly dry before folding and storing in a cool, dry place.

TROUBLESHOOTING

Refer to this table for common issues and their solutions.

Problem	Possible Cause	Solution
Hot tub not heating	Power supply issue; Heater element malfunction; Temperature set too low.	Check power connection and GFCI. Ensure heater is activated and temperature is set above current water temperature.

Problem	Possible Cause	Solution
Air jets not working	Air pump malfunction; Blocked air nozzles.	Ensure air pump is connected and activated. Check for debris in air nozzles.
Water is cloudy	Dirty filter cartridge; Improper water chemistry.	Clean or replace filter cartridge. Test water chemistry and adjust as needed (e.g., pH, sanitizer).
Hot tub losing air	Loose inflation valve cap; Puncture in liner.	Ensure inflation valve cap is tightly secured. Locate and repair any punctures using the provided repair patch.

TECHNICAL SPECIFICATIONS
