4. SETUP AND FIRST USE

1. **Unpacking:** Carefully remove all packaging materials and check that all components are present and undamaged.
2. **Initial Cleaning:** Before first use, clean the stainless steel milk container and whisk attachments thoroughly with warm soapy water. Rinse and dry completely. Wipe the induction base unit with a damp cloth. Do not immerse the base unit in water.
3. **Placement:** Place the induction base unit on a stable, flat, heat-resistant surface, away from water sources.
4. **Power Connection:** Plug the power cord into a suitable mains socket.

5. OPERATING INSTRUCTIONS

The Severin Spuma Lite offers versatile functions for various milk preparations.

5.1. Hot Milk Frothing

1. Insert the **frothing whisk** into the milk container.
2. Pour cold milk into the container. Do not exceed the 'MAX FOAM' fill line (approx. 220 ml).
3. Place the lid on the container and position the container securely on the induction base.
4. Press the power button once to start the hot frothing program. The indicator light will illuminate.
5. The appliance will automatically stop when the frothing process is complete.
6. Carefully remove the container by the handle and pour the frothed milk.

5.2. Cold Milk Frothing

1. Insert the **frothing whisk** into the milk container.
2. Pour cold milk into the container. Do not exceed the 'MAX FOAM' fill line (approx. 220 ml).
3. Place the lid on the container and position the container securely on the induction base.
4. Press and hold the power button for approximately 2 seconds to activate the cold frothing program. The indicator light will flash.

5. The appliance will automatically stop when the frothing process is complete.

5.3. Heating Milk (without frothing)

1. Insert the **stirring whisk** (without the spring) into the milk container.
2. Pour milk into the container. Do not exceed the 'MAX HEAT' fill line (approx. 400 ml).
3. Place the lid on the container and position the container securely on the induction base.
4. Press the power button once to start the heating program. The indicator light will illuminate.
5. The appliance will automatically stop when the milk is heated.

5.4. Hot Chocolate Function

This frother is equipped with a special function for preparing hot chocolate from chocolate pieces or cocoa powder.

1. Insert the **stirring whisk** into the milk container.
2. Add milk and your desired amount of chocolate pieces or cocoa powder to the container. Do not exceed the 'MAX HEAT' fill line (approx. 400 ml).
3. Place the lid on the container and position the container securely on the induction base.
4. Press the dedicated chocolate function button (if available, refer to control panel symbols) or use the standard heating function.
5. The appliance will heat and stir the mixture until the chocolate is melted and well combined.

6. CLEANING AND MAINTENANCE

Regular cleaning ensures the longevity and hygiene of your milk frother.

1. **Unplug:** Always unplug the appliance from the mains socket before cleaning.
2. **Cool Down:** Allow the appliance to cool down completely before cleaning.
3. **Milk Container and Whisks:** The stainless steel milk container and whisk attachments are dishwasher-safe for convenient cleaning. Alternatively, they can be washed by hand with warm soapy water and a soft sponge. Rinse thoroughly and dry completely.
4. **Base Unit:** Wipe the induction base unit with a soft, damp cloth. Do not use abrasive cleaners, scouring pads, or harsh chemicals, as these can damage the surface. Never immerse the base unit in water.
5. **Storage:** Store the appliance in a dry place when not in use.

7. TROUBLESHOOTING

If you encounter issues with your milk frother, refer to the following common problems and solutions:

- **Appliance does not turn on:**
 - Check if the power plug is securely inserted into the mains socket.
 - Ensure the milk container is correctly placed on the induction base.
- **Milk is not frothing or heating properly:**
 - Ensure you are using the correct whisk for the desired function (frothing whisk for foam, stirring whisk for heating).
 - Check that the milk level is within the 'MAX FOAM' or 'MAX HEAT' lines.
