## VEVOR Ganymede

# VEVOR H13 HEPA Air Purifier

## MODEL GANYMEDE USER MANUAL

### Introduction

Thank you for choosing the VEVOR H13 HEPA Air Purifier, Model Ganymede. This manual provides essential information for the safe operation, installation, maintenance, and troubleshooting of your new air purifier. Please read this manual thoroughly before use and retain it for future reference. This air purifier is designed to improve indoor air quality by filtering out various airborne particles and odors, providing a cleaner and healthier environment for your home or office.

### Important Safety Instructions

To reduce the risk of fire, electric shock, or injury, please follow these basic precautions:

- Read all instructions before operating the appliance.
- Always unplug the air purifier before moving it, opening the grille, changing filters, cleaning, or whenever it is not in use.
- Do not operate any appliance with a damaged cord or plug. If the fan motor fails to operate, or if the unit has been dropped or damaged in any manner, contact customer service.
- Do not use the air purifier outdoors.
- Place the air purifier on a firm, level surface.
- Do not run power cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Arrange cord away from traffic area and where it will not be tripped over.
- Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the air purifier.
- Do not block air intakes or exhaust in any manner.
- Use this appliance only for its intended household use as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury to persons.
- Always supervise children and pets around the air purifier. The child lock feature should be used to prevent accidental operation.

## Product Overview

The VEVOR H13 HEPA Air Purifier is designed with a sleek, compact form factor and an intuitive touch control panel. It features a multi-stage filtration system to effectively clean the air in your environment.

# Effective Air Cleaning Instant Fresh Air

**1344 ft<sup>2</sup>**  
in 1 hour

**300 m<sup>3</sup>/h**  
CADR

### Key Components:

- **Air Inlet Grille:** Where air enters the purifier for filtration.
- **Control Panel:** Touch-sensitive interface for all functions and settings.
- **Air Outlet:** Where purified air is released.
- **Multi-Layer Filter:** Consists of a pre-filter, H13 HEPA filter, and activated carbon filter.
- **Air Quality Sensor:** Detects real-time air quality for automatic adjustments.

Image: Diagram illustrating the three-stage filtration system: Pre-Filter Layer (blocks hair, dust), H13 HEPA Layer (filters PM2.5, PM0.3, pollen, particles as small as 0.1  $\mu\text{m}$ ), and Activated Carbon Layer (adsorbs VOCs & harmful gases).

## Setup Instructions

Follow these steps to set up your VEVOR Air Purifier:

1. **Unpack the Unit:** Carefully remove the air purifier from its packaging. Retain all packaging materials for future storage or transport.
2. **Remove Filter Packaging:** Before first use, the filter inside the unit is sealed in a plastic bag. Open the back cover of the air purifier, remove the filter, and take it out of its protective plastic packaging.
3. **Install Filter:** Place the unwrapped filter back into the air purifier, ensuring it is seated correctly. Close the back cover securely.
4. **Position the Air Purifier:** Place the unit on a flat, stable surface. Ensure there is at least 15 cm (6 inches) of space around all sides for optimal airflow. Avoid placing it directly against walls or furniture.
5. **Connect Power:** Plug the power cord into a standard electrical outlet. The unit is now ready for operation.

## Operating Instructions

Your VEVOR Air Purifier features an intuitive touch control panel for easy operation.

## Convenient Touch Panel

Innovative touchpad for easy control

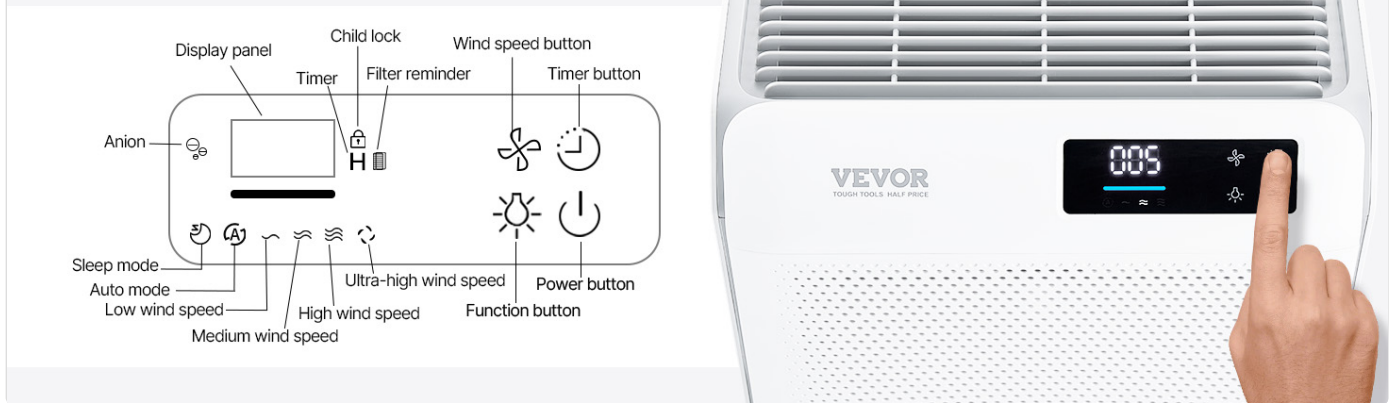

Image: Close-up of the VEVOR Air Purifier's touch control panel, showing icons for timer, fan speeds, and other functions.

### Control Panel Functions:

- **Power Button (U):** Press to turn the unit On or Off.
- **Fan Speed Button (F):** Cycles through Low, Medium, High fan speeds.
- **Auto Mode Button (A):** Activates automatic fan speed adjustment based on detected air quality.
- **Sleep Mode Button (Zz):** Sets the unit to its quietest operation with lights dimmed or off for undisturbed sleep.
- **Timer Button (T):** Sets the operating time for 1, 2, 4, 8, or 12 hours. The unit will automatically turn off after the set time.
- **Child Lock Button (L):** Press and hold for 3 seconds to activate/deactivate. Prevents accidental changes to settings.
- **Filter Reset Indicator:** Lights up when it's time to replace the filter.
- **Air Quality Indicator:** Changes color (Blue, Green, Orange, Red) to show real-time air quality.

### Air Quality Indicator Guide:

- Press and hold the function key for 3 seconds to activate
- Avoid accidental touches by children
- Avoid accidental touches by pets

Image: Visual guide for the air quality indicator: Blue (Excellent Air Quality,  $PM_{2.5} \leq 50$ ), Green (Good Air Quality,  $50 < PM_{2.5} \leq 100$ ), Orange (Fair Air Quality,  $100 < PM_{2.5} \leq 150$ ), Red (Poor Air Quality,  $PM_{2.5} > 150$ ).

### Child Lock Activation:

To activate the child lock, press and hold the Function button (often represented by a lock icon or combined with another button) for 3 seconds. This will prevent accidental touches by children or pets. Repeat the action to deactivate.

## Maintenance

Regular maintenance ensures optimal performance and extends the lifespan of your air purifier.

### Filter Replacement:

The filter typically needs to be replaced every 6-12 months, depending on usage and air quality. The Filter Reset Indicator will illuminate when replacement is due.

1. **Power Off and Unplug:** Always turn off and unplug the air purifier before attempting any maintenance.
2. **Open Back Cover:** Locate and open the back cover of the unit.
3. **Remove Old Filter:** Carefully pull out the used multi-layer filter. Dispose of it properly.
4. **Insert New Filter:** Unwrap the new filter and insert it into the unit, ensuring it fits snugly.
5. **Close Cover:** Close the back cover securely.
6. **Reset Filter Indicator:** Plug in the unit. With the unit powered on, press and hold the Filter Reset button (or the designated button as per your model's control panel) for 3-5 seconds until the indicator light turns off.

### Cleaning the Unit:

- **Exterior:** Wipe the exterior surfaces of the air purifier with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- **Air Inlet/Outlet:** Use a soft brush or vacuum cleaner with a brush attachment to gently clean dust from the air inlet and outlet grilles.
- **Air Quality Sensor:** Periodically clean the air quality sensor located on the side or back of the unit with a dry cotton swab to ensure accurate readings.

## Troubleshooting

If you encounter any issues with your air purifier, please refer to the following table for common problems and solutions:

| <b>Problem</b>  | <b>Possible Cause</b>   | <b>Solution</b>   |
|---|---|---|
| Unit does not turn on                                 | No power; Power cord not properly plugged in; Power outlet not working.             | Check power cord connection; Try a different outlet; Ensure power switch is ON.         |
| Weak airflow  | Air inlets/outlets blocked; Filter is dirty or clogged.                             | Clear any obstructions; Clean or replace the filter.                                    |
| Unusual noise   | Unit not on a level surface; Foreign object inside; Filter not installed correctly. | Place on a flat surface; Unplug and check for obstructions; Reinstall filter correctly. |
| Filter Reset Indicator remains on after filter change | Filter reset function not performed.  | Press and hold the Filter Reset button for 3-5 seconds to reset.                        |
| Air quality reading seems inaccurate                  | Air quality sensor is dirty.  | Clean the air quality sensor with a dry cotton swab.                                    |
