## Leveling

Use the adjustable feet at the bottom of the refrigerator to ensure it is level. This prevents vibrations and ensures proper door sealing.

## Initial Power-On

After placement, wait at least 2-4 hours before plugging in the refrigerator to allow refrigerants to settle. Once plugged in, set the temperature control to the recommended setting and allow the refrigerator to cool for several hours before loading

food.

## CONTROLS AND OPERATION

---

Your Whirlpool VitaMagic PRO refrigerator is equipped with advanced features for optimal food preservation.

### Temperature Control

The refrigerator features an intuitive UI panel for temperature management. Adjust the settings according to your needs and the ambient temperature. The 6th Sense Intellifrost technology automatically manages defrosting cycles.

Overview of the Whirlpool VitaMagicPro's key features including the UI Panel and Auto Defrost Technology.

### Special Features

- **Auto Defrost Technology:** This refrigerator is India's only automatic defrost single door refrigerator, powered by 6th sense Intellifrost technology, eliminating the need for manual defrosting.

## CARE AND CLEANING (MAINTENANCE)

---

Regular cleaning and maintenance will ensure the longevity and efficient operation of your refrigerator.

## Defrosting

Thanks to the Auto Defrost Technology, manual defrosting of the freezer compartment is not required. The system automatically manages ice build-up.

## Interior Cleaning

- Unplug the refrigerator before cleaning.
- Clean the interior with a solution of mild detergent and warm water.
- Wipe dry with a soft cloth.
- The anti-bacterial gasket should be cleaned regularly to prevent mold and mildew growth.

## Exterior Cleaning

Wipe the exterior surfaces with a soft, damp cloth. For stainless steel surfaces, use a specialized stainless steel cleaner if necessary. Avoid abrasive cleaners or solvents.

## TROUBLESHOOTING

Before contacting customer service, please refer to the following common issues and their solutions:

Problem	Possible Cause	Solution
Refrigerator not cooling	Power cord unplugged; Temperature control set too warm; Door not closed properly.	Check power connection; Adjust temperature setting; Ensure door is fully closed.
Unusual noises	Refrigerator not level; Objects vibrating against the unit; Compressor cycling.	Level the refrigerator; Remove vibrating objects; Compressor cycling is normal.
Water on floor	Drain tube clogged (unlikely with auto-defrost); Door not sealed.	Check door gasket for proper seal; Contact service if issue persists.
