

GWPDNOVAU

Eureka Nova UV+UF+HMR Water Purifier

MODEL: GWPDNOVAU

1. Product Overview

The Eureka Nova UV+UF+HMR Water Purifier is designed to provide purified drinking water. This model offers flexible installation as either a wall-mounted or countertop unit. It incorporates dual purification technology, combining Ultraviolet (UV) and Ultrafiltration (UF) methods to remove impurities and neutralize harmful microorganisms. Additionally, it features Active Copper with Zinc Booster Cartridge and Mineral Guard technology to enhance water quality.

The purifier has a purification capacity of 1.5 liters per minute, ensuring a steady supply of clean water for households or small offices.

2. Safety Information

- Read all instructions before operating the appliance.
- Ensure the power supply matches the specifications listed on the product label.
- Do not immerse the appliance, cord, or plug in water or other liquids.
- Keep the appliance away from direct sunlight, heat sources, and corrosive chemicals.
- Only use genuine replacement parts and filters.
- Children should be supervised to ensure they do not play with the appliance.
- Disconnect from power before cleaning or performing maintenance.

3. Package Contents

Verify that all items are present in the package:

- 1N Water Purifier Unit
- 1N Installation Kit (includes input pipe, diverter valve)

- 1N Warranty Card + QR Code

4. Setup and Installation

The Eureka Nova water purifier can be installed as a wall-mounted unit or placed on a countertop.

4.1 Wall-Mounted Installation

1. Choose a suitable location on a sturdy wall, ensuring sufficient space around the unit for maintenance.
2. Use the provided mounting template (if included) to mark drilling points.
3. Drill holes and insert wall plugs. Secure the mounting brackets (if separate) or hang the unit directly onto the screws.
4. Connect the input water pipe to the diverter valve on your water tap and to the purifier's inlet.
5. Connect the drain pipe to a suitable drainage point.

Figure 2: Back view of the purifier, illustrating the wall mounting points.

4.2 Countertop Installation

1. Place the purifier on a flat, stable surface near a water source and electrical outlet.
2. Connect the input water pipe to the diverter valve on your water tap and to the purifier's inlet.
3. Ensure the drain pipe is routed to a sink or drainage area.

Figure 3: Side view of the purifier, demonstrating its compact design for countertop use.

4.3 Initial Start-up

1. After connecting the water supply, slowly open the diverter valve to allow water to fill the purifier.
2. Check for any leaks.
3. Plug the power cord into a grounded electrical outlet.
4. Allow the unit to run for a few minutes and discard the first few liters of purified water to flush the system.

5. Operating Instructions

Once installed and powered on, the purifier will automatically begin the purification process. Indicator lights on the front panel will show the operational status.

5.1 Dispensing Water

Place a clean container under the water dispenser tap. Press the tap or lever to dispense purified water. Release to stop the flow.

5.2 Purification Process

The purifier utilizes multiple stages for comprehensive water treatment:

- **I-Filter:** Removes fine suspended particles like dust, dirt, and sand.
- **Chemi-Block:** Reduces excess chlorine and organic impurities.
- **UF Filter (Ultrafiltration):** Filters out ultra-fine suspended particles, cysts, and bacteria.
- **UV e-boiling (Ultraviolet):** Uses UV-C radiation to neutralize viruses and bacteria, ensuring microbiologically safe water.
- **Active Copper with Zinc Booster Cartridge:** Infuses essential copper and zinc minerals into the water.
- **Mineral Guard / Mineral Magnet:** Helps retain essential natural minerals in the purified water.

Advanced Technologies for Complete Purification

Ultraviolet (UV-C)

Ensures delivery of virus and bacteria-free pure water & eliminates risk of diseases.

Ultrafiltration (UF)

Makes your water crystal clear by removing ultra-fine suspended particles.

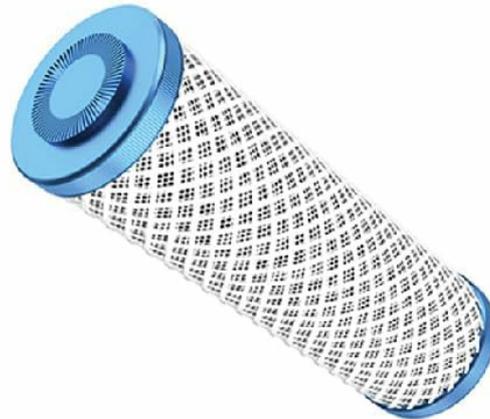

Figure 4: Advanced purification technologies: Ultraviolet (UV-C) for virus and bacteria elimination, and Ultrafiltration (UF) for removing ultra-fine suspended particles.

Mineral Charge Technology

Increases the level of essential minerals like Calcium & Magnesium in the purified water

6. Maintenance

Regular maintenance ensures optimal performance and longevity of your water purifier.

6.1 Filter Replacement

The various filters have a limited lifespan and require periodic replacement. The frequency depends on water quality and usage. Refer to the indicator lights or consult your service technician for recommended replacement schedules.

- **I-Filter, Chemi-Block, UF Filter:** Typically replaced every 6-12 months.
- **Active Copper with Zinc Booster Cartridge:** Typically replaced annually.
- **UV Lamp:** Has an effective lifespan and should be replaced as recommended by the manufacturer.

Note: Filter replacement should ideally be performed by a certified service technician to ensure proper installation and hygiene.

6.2 Cleaning

- Wipe the exterior of the purifier with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.

- Clean the water dispensing area regularly to prevent buildup.
- Ensure the water storage tank is cleaned periodically during routine service.

7. Troubleshooting

If you encounter any issues, refer to the following common troubleshooting steps. For complex problems, contact customer support.

Problem	Possible Cause	Solution
No water dispensing	No power, water supply off, clogged filter, airlock.	Check power connection, ensure water supply is open, contact service for filter check or airlock removal.
Slow water flow	Clogged filter, low water pressure.	Contact service for filter replacement, check household water pressure.
Unusual taste/odor	Expired filters, new filter installation.	Replace filters. If new, flush more water through the system.
Leakage	Loose connections, damaged component.	Tighten connections. If leakage persists, contact customer support immediately.

8. Specifications

Feature	Detail
Brand	Generic
Model Name	GWPDNOVAU
Special Feature	Select Copper Nova UV+UF Copper UV inline, Active Copper
Product Dimensions	30L x 30W x 30H Centimeters
Installation Type	Wall-mounted, Countertop
Power Source	ELECTRIC
Item Weight	5 Kilograms
Manufacture Year	2024
Colour	Black
Material	Plastic
Capacity	6.2 Liters (Storage)
Purification Capacity	1.5 liters per minute

9. Warranty and Support

Your Eureka Nova water purifier comes with comprehensive support and warranty benefits.

9.1 Warranty Information

- **1 Year Comprehensive Warranty:** Covers manufacturing defects for one year from the date of purchase.

9.2 Post-Purchase Services

- **Free Installation:** Professional installation services are provided at no additional cost.
- **2 Free Services:** Benefit from two complimentary service visits.
- Access to a network of 8500+ certified service technicians across 800+ cities.

The infographic features a smiling male technician in a blue shirt with a name tag that reads 'EUREKA FORBES GENUINE SERVICE'. He is holding a white smartphone displaying 'AQUAGUARD GENUINE AMC' and a 'BOOK NOW' button. To his right, four dashed-line callouts list the benefits: 'Free Installation' (gear icon), '2 Free Services*' (wrench and hammer icon), '1 Year - NO Questions Asked Comprehensive Warranty' (shield with checkmark icon), and '8500+ Certified Service Technicians across 800+ Cities' (technician icon). A '*T&C Apply' note is at the bottom right.
