## 5. MAINTENANCE AND CARE

### 5.1 Fabric Care

- **Regular Cleaning:** Vacuum the fabric regularly using an upholstery attachment to remove dust and debris.
- **Spot Cleaning:** For spills, blot immediately with a clean, dry cloth. Do not rub. Use a mild fabric cleaner on a hidden area first to test for colorfastness.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause fabric fading.

## 5.2 Mattress Care

- **Rotation:** Rotate the mattress periodically (e.g., every 3-6 months) to ensure even wear.
- **Ventilation:** Allow the mattress to air out occasionally by removing bedding.
- **Protection:** Use a mattress protector to guard against spills and stains.

## 5.3 Mechanism Care

- **Lubrication:** Periodically check the moving parts of the conversion mechanism. If movement becomes stiff, apply a silicone-based lubricant to hinges and joints.
- **Inspection:** Regularly inspect all bolts and fasteners for tightness and re-tighten as necessary.

# 6. TROUBLESHOOTING

- **Sofa not converting smoothly:**
  - Ensure no obstructions (e.g., pillows, blankets) are caught in the mechanism.
  - Check if all assembly bolts are securely tightened.
  - Lubricate the moving parts of the mechanism as described in Section 5.3.
- **Sofa feels unstable:**
  - Verify that the sofa is placed on a level surface.
  - Re-tighten all assembly hardware.
- **Headrests not adjusting:**
  - Ensure no fabric or debris is obstructing the adjustment mechanism.
  - Apply gentle, even pressure when adjusting.
